This three-day professional development workshop is designed to teach traffic engineers, planners and other transportation professionals, good design principles of pedestrian and bicycle facilities such as intersection design, signalization, and dedicated bicycle lanes. Specific topics covered include:

**Pedestrian (2 days):**
- Planning factors for good pedestrian design
- Sidewalk design elements
- Pedestrian street crossings and signals
- Intersection design
- ADA compliance

**Bicycle (1 day):**
- Principles of bicycling and designing for bicycling
- On-road bikeway designs
- Intersection design for bicycles
- Signing and marking facilities
- Shared use path design

**Participants also receive:**
- AASHTO Guide for the Planning, Design and Operation of Pedestrian Facilities ($90 value)
- AASHTO Guide for the Development of Bicycle Facilities ($45 value)
- Professional development credit: LAPELS, ASLA, APA
