Summary

The purpose of this spatial file is to provide a basic network of on-street bikeways across Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany, and Tangipahoa Parishes that integrate into a regional network. Any bikeway planning layer produced by Jefferson Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany, and Tangipahoa Parishes supersedes all information in this data set. This data set is to be used in coordination with the shared-use trail data set supplied separately. Describes the facility type of the bikeway segment.

Description

The bikeways included in this data layer denote on-street bicycle facilities by their current completion status. Routes of regional significance as determined by RPC planning staff have been denoted to advance regional connectivity for funded, planned and envisioned bikeways. All attributes not defined are from the most recent LaDOTD roadway base layer.
