Federal Aid Network, New Orleans Regional Planning Commission, LA DOTD

### Summary

The Federal-aid primary highway system (FAP system) is a system of connected main highways, selected by each state highway department in coordination with the Metropolitan Planning Organization (MPO) by functional class within the urbanized area planning boundaries.

### Description

The Federal-Aid Highway Program supports State highway systems by providing financial assistance for the construction, maintenance and operations of the Nation's 3.9 million-mile highway network, including the Interstate Highway System, primary highways and secondary local roads. The Federal Highway Administration (FHWA) is charged with implementing the Federal-aid Highway Program in cooperation with the States and local government.

Local government - primarily counties, cities and towns, or local public agencies (LPAs) - own and operate about 75 percent, or roughly 2.9 million miles, of the Nation's highway network. LPAs build and maintain this network using a variety of funding sources, including the Federal-aid Highway Program. An estimated 7,000 LPAs manage about \$7 billion annually in Federal-aid projects, or roughly 15 percent of the total program.

That's why understanding Federal-aid requirements is so important in the delivery of Federal-aid projects at the local level. Federal-aid Essentials highlights key components of the program to help LPAs and their State partners successfully manage locally administered Federal-aid projects.

## RESOURCE MAINTENANCE

UPDATE FREQUENCY as needed

## TIME PERIOD BETWEEN UPDATES

TIME DURATION After urbanized boundary updates following decennial Census and also as changes are needed as with LA DOTD approval.

## OTHER MAINTENANCE REQUIREMENTS

LA DOTD published the official GIS layer for Louisiana Federal Aid Network in 2015. In 2018 Jefferson Parish requested the inclusion of Woodmere Rd., which RPC added to this layer after receiving LA DOTD approval.
