¹Urbanized Area: The U.S. Census Bureau formally recognizes densely settled communities and built-up areas both inside and outside the boundaries of large incorporated municipalities of 50,000 or more. Urbanized areas comprise one or more places and their adjacent densely settled surrounding area (urban fringe) consisting of other places and nonplace territory.

Population data provided by the U.S. Census American Community Survey (ACS) 5 year estimates (2015-2019) coinciding with RPC GIS geographic mapping scales.
