Mandeville-Covington Urbanized Area TIP FFY 23-26

Introduction

The Transportation Improvement Program (TIP) is adopted every four years by the Regional Planning Commission (RPC). This document is prepared cooperatively by the RPC, acting in its legal capacity pursuant to 23 CFR 450 as the Metropolitan Planning Organization for the Mandeville-Covington Urbanized Area, and the Louisiana Department of Transportation and Development (DOTD) and affected transit operators. The TIP consists of a priority list of projects that are being advanced toward construction over the four-year period from Federal Fiscal Year 2023 to Federal Fiscal Year 2026. Projects found in the TIP have evolved through the transportation planning process and are contained in the region's long-range Metropolitan Transportation Plan (MTP). The RPC reviews the TIP annually and selected revisions are permitted, following formal amendment procedures. The TIP may be viewed on RPC's website at www.norpc.org.

Both the local TIP and State TIP (STIP) are identical documents containing a common set of projects proposed for federal funding. The TIP and STIP are products of a consensus building process carried out jointly by the RPC and DOTD, and both are on a fouryear update cycle.

Candidate projects for MTP and TIP consideration come from various sources, including RPC's public outreach initiative, input from business, civic, and community organizations, state and local governmental entities, and other transportation stakeholders. Projects are first screened by RPC for technical merit and consistency with the region's adopted transportation goals and the ten planning factors which guide the implementation of the nation's transportation bill, the FAST Act of 2015 and its successor legislation, the Infrastructure Investment and Jobs Act of 2021 (IIJA, also known as the Bipartisan Infrastructure Law (BIL))¹. Following the initial project screening process, potential projects are accepted into the MTP for further evaluation and refinement. During the planning phase, projects undergo a series of rigorous technical analyses to determine overall feasibility, environmental consequences, project costs, and potential funding sources before being advanced into final design, project letting, and construction implementation.

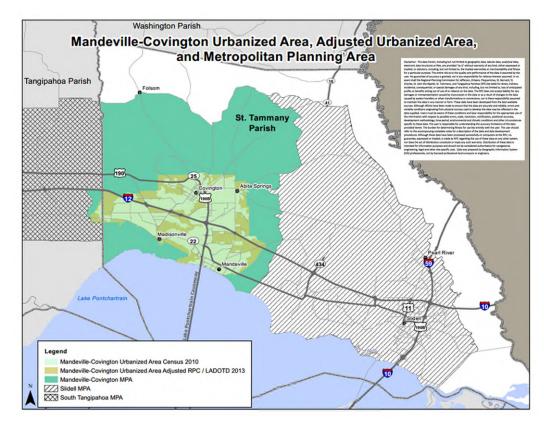

Citizens, affected public agencies, private transportation providers, and other interested parties are invited to review and comment on the document. Comments and questions should be directed to the attention of:

Jason Sappington Deputy Director 504-483-8500 jsappington@norpc.org 10 Veterans Memorial Boulevard New Orleans, LA 70124-1162

¹ IIJA was passed in 2021, and some final rules were still pending as of the writing of this document. The RPC will continue to update its planning processes and associated documents as necessary pending the release of final rules.

The Mandeville-Covington Urbanized Area

The Mandeville-Covington Urbanized Area (UZA) encompasses the Cities of Mandeville, Covington, Madisonville, Abita Springs, and multiple unincorporated communities in the western portion of St. Tammany Parish. The Metropolitan Planning Area (MPA) encompasses the UZA as well as the portions of the region that are expected to become urbanized in the next 20 years, and which the RPC must consider in its transportation planning process. In 2019 the total estimated combined population of the Mandeville-Covington MPA was just over 130,000². The map below shows the MPA and UZA, as well as the Adjusted UZA, which have been developed in coordination with the RPC, local and state officials to incorporate "smoothed" boundaries that enable more comprehensive planning.

² American Community Survey (ACS) 5 Year Summary File (2015-2019), Published December 2020 by U.S. Census Bureau.

TIP Development Process

The projects contained in the TIP are derived from the region's overall 30-year MTP. Both the TIP and MTP have been fiscally constrained (based on past funding history) to reflect realistic and available levels of project funding. Projects shown in the TIP for advancement were fully discussed with the RPC Technical Advisory Committee, DOTD, and local transit providers prior to placement in the TIP. Only projects which were mutually agreed upon by these stakeholders as to overall merit and funding availability were selected for TIP and STIP inclusion. The TIP also contains a list of all highway and transit projects obligated for implementation as part of the previous TIP (FFY-19 through FFY-22).

Planning Process

Moving from planning to project implementation requires evaluating the feasibility of potential system improvements, and a means by which to prioritize projects. Though the process of identifying, developing, and implementing projects is complex, it can be summarized in the following steps:

- 1. Identify Opportunities for Improvement: Most projects begin with the identification of an opportunity to change the transportation system in a way that will better serve the region. For example, there may be a problem that needs to be solved such as congestion at a major intersection, or there may be an unmet need that can be addressed, such as increasing non-motorized access to a neighborhood. Such opportunities are identified through a wide variety of sources, including public engagement, input from elected officials, RPC's planning programs, and staff expertise.
- 2. Study Potential Options: Once an opportunity for change has been identified the RPC studies how it can be accomplished through modifications to the transportation system. For example, if there is a need to reduce crashes at a particular location, can that be done through infrastructure improvements, operational changes, or other alterations? The timeline and level of effort required for such studies depend on the complexity of the issue and its potential impacts on the community.
- 3. Define Projects: The previous two steps result in recommendations for real-world projects that will improve the transportation system. Once a potential project has been defined, further refinements are completed as necessary. It should be noted that there is no single list of potential projects developed at one point in time from which the RPC chooses projects to be included in the MTP or TIP. Rather, projects are developed on an ongoing basis using a continuing, comprehensive, and cooperative ("3C") process which acknowledges that individual projects and their sponsors require differing timelines and development tasks to reach implementation readiness.
- 4. Fund and Prioritize Projects: After a project has been defined, the RPC determines how it may be funded and how its implementation will be prioritized among the many other projects within the RPC's program. Project prioritization depends on multiple interrelated factors, including stakeholder support, potential impact and need, and funding availability.

RPC Programs

The steps described above are accomplished through the ongoing implementation of multiple RPC processes and programs. While these efforts are described separately below, the RPC recognizes that the region's transportation network is an integrated system, and accordingly conducts holistic planning efforts that utilize best available practices, methods, and technologies.

- **Public Transit & Human Services:** The RPC provides planning and technical support to public transit operators as they seek to modernize fleets and provide access across the region. RPC's Coordinated Public Transit-Human Services Program is complementary to its transit planning program, and focuses on serving the needs of low-income, elderly, and disabled populations in the region. It is guided by the Coordinated Public Transit-Human Services Plan, most recently updated in 2020, which outlines regional needs and presents a series of goals, objectives and strategies for serving vulnerable populations.
- Walking and Biking: Facilitating safe walking and biking is integral to RPC's planning process, and the potential for adding or enhancing non-motorized facilities is considered during the development of all projects. In addition to considering the needs of people walking and biking at the project level the RPC also continues to engage in larger-scale programs intended to increase the use of non-motorized modes across the region. The agency works to accomplish this with data-driven analysis and decision-making; planning and design for comprehensive land use and sustainable transportation; and a range of educational and outreach tools.
- Roads, Highways, and Bridges: Maintaining and improving the region's roads and highways has been a central concern of the RPC since its creation. Ensuring that drivers can expect reliable travel times on roads and bridges that are in a state of good repair will continue to be a primary focus for the transportation planning process.
 - Congestion Management: Much of the RPC's work regarding travel reliability for motor vehicles centers on the Congestion Management Process (CMP), an ongoing series of activities that identifies traffic congestion throughout the region, defines needs related to congestion reduction, and recommends congestion mitigation strategies. The Process was updated in 2021 and includes a System Performance Report that describes overall congestion on the many of the region's most significant corridors.
 - State of Good Repair: The RPC evaluates the need for roadway maintenance and repair through two primary mechanisms: quantitative performance measures and stakeholder input. Road and bridge conditions are two of the federally-required performance measures tracked by the RPC, further discussed in the Performance Based Planning and Programming section below. The measures provide both an overview of regional conditions as well as conditions on specific roadways. The RPC receives further detail about which roadways should be prioritized for repair from local and state partners, who are encouraged to utilize the RPC's resources to maintain the system in a state of good

repair.

- Freight: MPOs are not required to develop a regional Freight Mobility Plan; however, the centrality of freight to the region's economy and the significance of the region to national freight networks point to the need for a deliberative freight planning process. The regional Freight Mobility Plan, developed concurrently with the TIP and MTP, will guide the RPC Freight Program and inform the overall planning process. In addition to broad policy goals, the Freight Mobility Plan describes processes for project evaluation and implementation as well as recommendations for projects and studies that will improve freight movement throughout the region. With its completion the RPC has established a vision and process for considering freight needs and identifying necessary improvements.
- Safety: The RPC continues to integrate safety within all projects and programming to reduce fatalities and serious injuries. Safety goals for the RPC are closely linked to Louisiana's Strategic Highway Safety Plan (SHSP), a data-driven approach led in part by DOTD. In addition, the U.S. Department of Transportation (DOT) has formally committed to the long term goal of reducing road fatalities to zero, the only acceptable number. This commitment is part of a new strategy to implement the National Roadway Safety Strategy (NRSS), which outlines the USDOT's comprehensive approach to significantly reduce deaths and serious injuries to zero on our nation's roadways. The NRSS adopted the Safe System approach, which was founded on the principles that humans make mistakes and that human bodies have limited ability to tolerate crash impacts. The RPC is committed to this approach and addressing traffic safety as a public health issue. Each project introduces opportunities to evaluate crash histories and unsafe conditions, and to identify modifications that will reduce injuries and fatalities.
- Transportation Resilience: As the need to protect the community against hazardous events becomes increasingly apparent the RPC has begun building a transportation resilience planning program. As the RPC seeks to enhance the resilience of the system itself it will also need to carefully consider how those improvements can most effectively benefit the community. The IIJA includes important provisions that will help guide the RPC's work. In particular, it describes optional Resilience Improvement Plans that may be developed by MPOs. These plans will provide a systemic approach to addressing transportation vulnerabilities and identify potential courses of action for improving regional resilience. The RPC intends to create a Resilience Improvement Plan when full guidance becomes available, likely in the fall of 2022, and will incorporate its recommendations into the larger planning process.

Each of the programs described above directly contributes to development of the TIP. They direct RPC staff to identify opportunities for improvement, define specific concerns to be studied, and recommend strategies to be incorporated into projects to address program-related needs. They also offer insight into how projects should be prioritized by providing RPC staff with data and clearly defined objectives against which projects can be evaluated.

Fiscal Constraint

Both the TIP and MTP have been fiscally constrained to reflect realistic and available levels of project funding. Projected future funding levels are based on past funding trends as well as ongoing coordination with DOTD, transit operators, and local partners. The federal funding available to the Mandevill-Covington MPA and transit operators is determined by formula outlined in federal legislation, and specific amounts available are communicated to the RPC by DOTD on a regular basis, at least once per fiscal year. Further, RPC and DOTD conduct project reviews (termed "whiteboard meetings") to periodically review the program and make adjustments based on implementation progress. This ongoing process allows the RPC to develop an average estimated amount of both federal and non-federal financial resources that can be used as a benchmark in the prioritization process.

Over time the region has experienced an overall increase in construction spending due to improved coordination of the planning and programming efforts of RPC and DOTD. Fiscal constraint has resulted in a goals-oriented approach emphasizing traffic safety, transit reliability, and roadway system preservation.

Projects identified for National Highway Performance Program (NHPP) funding are part of DOTD's Priority Program and have been approved by the RPC. The NHPP funds shown in the TIP are primarily directed toward the elimination of traffic congestion, particularly on interstates and other major federal and state routes. Projects shown for Surface Transportation Program funding (STP<200K) for urbanized areas less than 200,000 in population are also fiscally constrained, reflecting the annual attributable amount plus 20% local (non-federal) match. The region has a positive balance of attributable funds that may be utilized on occasion to cover an increase in project costs due to environmental, construction or right-of-way needs. Further details on highway projects funded through the Surface Transportation Block Grant (STBG) program can be seen in Appendix B.

On the transit side, the majority of federal project funding is based on Section 5307 small urbanized area formula funds which are listed annually in the *Federal Register*. Under the FAST Act and its preceding legislation MAP-21, Section 5307 funding has averaged about \$2 to 2.3 million for the St. Tammany urbanized areas. These funds are programmed based on current or pending Congressional authorizations. Matching funds for transit projects come from parish or other local revenue sources.

The FY 2023-2026 does not include funding sources that were not also available for the previous TIP (FFY 2019-2022). However, it is expected that the IIJA will introduce multiple new funding sources that the region may use in future projects. As guidance for these funds and associated programs continues to be promulgated, the RPC will consult with DOTD, local partners, and federal agencies to determine appropriate action for incorporating them into the TIP. It is anticipated that while the IIJA has introduced many new programs the overall process for determining available funding levels and ensuring fiscal constraint will remain similar to current practice.

Distribution of Document for Public Review

Copies of the draft TIP are placed at libraries throughout the metropolitan region and posted online at www.norpc.org for citizen review, input and comment. The public is also afforded the opportunity to express their comments directly to the Transportation Policy Committee at a meeting prior to official action on the TIP document. Consistent with RPC's Public Involvement Plan, RPC provided a 30 day public comment period for review of the draft FY23-26 TIP, from December 9, 2022 to January 10, 2023. During this time the document was available for review and comment on the RPC website, at public libraries, and by request. This availability was announced on the website as well as in two public notices in *The Times Picayune | The New Orleans Advocate*.

January 10, 2023 was the end date for public comment, as well as the date of the regular Transportation Policy Committee meeting. During this meeting time was made for additional public comment on the TIP. Notice of the meeting was given through the methods described above, as well as through the standard notice which is placed in the newspaper one week prior to every RPC Board meeting. This meeting takes place at the Regional Transportation Management Center, a facility that is ADA accessible and is close to bus stops on both the New Orleans Regional Transit Authority's 45 (Lakeview) route and the Jefferson Transit's E1 (Veterans Blvd) route. No comments were received on the TIP during this review period. The resolution indicating TPC approval of the TIP can be seen in Appendix A.

Screening and Prioritization of Projects

Once potential projects have been identified they are screened and prioritized based on three primary mechanisms: project readiness and stakeholder input; support of the regional priorities established in the MTP; and contribution to the achievement of specified performance measure targets. These mechanisms are interrelated and their impacts on project selection and prioritization vary from project to project.

The process for determining a project's readiness, its support of the MTP, and its contribution to achieving targets is summarized below. The RPC's overall process for selecting and prioritizing projects has remained relatively stable since the previous TIP, though specific programmatic recommendations have evolved over time. These updates, and the planning process in general, are more thoroughly described in the <u>MTP</u>. Additional information about how individual RPC programs impact project development and selection can be found in the <u>CMP</u>, the <u>Regional Freight Mobility Plan</u>, the <u>Unified Planning Work Program</u>, and other planning documents available on the RPC's website (<u>www.norpc.org</u>).

Project Readiness

The RPC works very closely with DOTD staff and local parish Departments of Public Works (DPW's) to establish realistic project priorities, based on where the project actually rests in the implementation pipeline. Meetings are held at least quarterly with DOTD to monitor the actual status of TIP projects and scheduled letting dates. This periodic review has helped the region to establish firm project priorities rather than "paper" priorities. The review considers important factors such as the status of environmental clearances, survey work, preliminary plans, right-of-way, utilities, advance check prints and final plan preparation. When taken together, these criteria establish the relevant let date and, therefore, the priority order for implementation of TIP projects. The cost of the project, type of funding, and the availability of proposed funding are also considered in priority setting. The above project level information is made available to the Technical Advisory Committee, or the general public upon request, and project work status is utilized extensively in establishing the priority program. The draft TIP is also presented to the Transportation Policy Board for review and input, along with any citizens' comments received, prior to finalization of priorities.

Relationship to MTP

Projects in the MTP are selected through a consultative process with the state, local transit operators, and the region's Transportation Policy Board. This process is further informed by the various RPC programs described in the previous section. Following inclusion in the MTP, projects are advanced into the TIP based on their need or merit and the ability of the state and region to finance the improvement. As such, projects contained in the TIP are a result of the region's transportation planning process and are supportive of the planning Priorities identified in the MTP: Resilience & Sustainability; Equity; Economic Opportunity; Access & Mobility; Safety & Security; and Stewardship.

Prior to inclusion in the MTP or TIP each project is reviewed by RPC staff to determine its relationship to the regional Priorities. All projects must contribute to at least one MTP Priority to be included in the MTP or TIP, and most projects contribute to more than one Priority. Projects are categorized using a form within the RPC's project tracking database that consists of the following prompts:

- Safety & Security: Does this project incorporate safety improvements designed to decrease risk for transportation system users?
- **Sustainability & Resilience:** Does this project minimize negative environmental impacts while enhancing the region's ability to withstand and recover from natural hazards?
- **Equity:** Does this project improve quality of life for disadvantaged communities as well as benefit the entire regional population?
- **Economic Opportunity:** Does this project provide residents with access to employment, facilitate the movement of goods, and connect businesses with customers?
- **Reliability & Connectivity:** Does this project improve travel time reliability for all system users or improve multimodal connectivity?
- **Preservation & Stewardship:** Does this project maintain or enhance functionality of the existing infrastructure for transportation system users?

The number of projects contributing to each Priority is described in the table below and each project page in the TIP indicates the MTP Priorities to which that project is related.

MTP Priority	Number of Projects Contributing to Priority	Percentage of Projects Contributing to Priority
Safety & Security	10	45%
Sustainability & Resilience	5	23%
Equity	2	9%
Economic Opportunity	6	27%
Reliability & Connectivity	16	73%
System Preservation &		
Stewardship	8	36%

Mandeville-Covington Urbanized Area TIP Projects' Contribution to MTP Priorities

By implementing a program of projects that have each been determined to contribute to the MTP Priorities it can be expected that over the next four Federal Fiscal Years the region will incrementally advance progress towards addressing the Priorities.

Performance Based Planning and Programming

Performance Based Planning and Programming (PBPP) is an approach adopted by FHWA, FTA, state DOTs, transit agencies, and MPOs to use quantitative data and other information to strategically direct transportation decision-making. PBPP is a systematic, evidence-based approach to integrating data into the transportation planning process at all levels, from concept to design and implementation. It is important to note that PBPP is not intended to supplant the decision-making roles and responsibilities of the general public, elected officials, or technical experts.

The use of PBPP by MPOs is formally codified by the FAST Act (23 CFR Part 490), which requires MPOs and State DOTs identify quantitative targets for several performance measures within four key policy areas: safety; infrastructure condition; system performance and freight; and Congestion Mitigation Air Quality (CMAQ). The specific performance measures and their applicability to the RPC are listed below. All performance measures consider the entire MPA; however, the infrastructure condition, system performance, and freight measures only evaluate performance on the Interstate and non-Interstate National Highway System (NHS).

Safety			
Number of fatalities			
Fatalities per million VMT			
Number of serious injuries			
Serious injuries per million VM	Т		
Number of non-motorized fatalities and non-motorized serious injuries			
Pavement & Bridge Condition			
	Percentage of Interstate pavement in good condition		
Pavement	Percentage of Interstate pavement in poor condition		
Pavement	Percentage of non-Interstate NHS in good condition		
	Percentage of non-Interstate NHS in poor condition		
Bridge	Percentage of NHS bridges in good condition		
	Percentage of NHS bridges in poor condition		
System Performance & Freig	jht		

Federally Required Performance Measures

Sustem Derformance	Interstate Travel Time Reliability (TTRM): percentage of person-miles traveled on the interstate that are reliable		
System Performance	Non-Interstate Travel Time Reliability (TTRM): percentage of person- miles traveled on the non-Interstate NHS that are reliable		
Freight	Truck Travel Time (TTTR) Reliability Index: percentage of truck miles traveled on the interstate that are reliable		
CMAQ*			
Troffic Congration	Peak Hour Excessive Delay (PHED)		
Traffic Congestion	Non-single Occupancy Vehicle Travel		
On-road Mobile Source Emissions	Total Emissions Reductions		
Transit Asset Management			
Rolling Stock	Percentage of Inventory Exceeding Useful Life		
Equipment	Percentage of Inventory Exceeding Useful Life Benchmark		
Facilities	Percentage of Inventory exceed 2.5 on TERM scale		
Infrastructure	Performance of Track Segment with Performance Restrictions		

* Federal regulations require that CMAQ performance measure targets shall be set by MPOs that contain area(s) designated as nonattainment or maintenance for ozone (O3), carbon monoxide (CO) or particulate matter (PM10 and PM2.5) National Ambient Air Quality Standards (NAAQS). There are currently no areas served by the RPC that meet any of these criteria.

For Safety, Pavement and Bridge Condition, System Performance and Freight, and CMAQ, DOTD is required to establish targets for each measure; the RPC may choose to develop its own targets or adopt those of the state. For Transit Asset Management measures, the region's transit providers establish their own targets and the RPC, in coordination with the providers, develops regional targets. Implementation of the performance measure requirements began in 2018 and the initial round of targets were detailed in the previous MTP, adopted in January 2019. Safety performance targets are required to be updated annually, and the RPC has done so via MTP amendment each year since 2019. All other performance measures are updated every four years, which means the next round of targets will be included as an amendment to MTP 2052 in early 2023. Additionally, the RPC publishes an annual report each year describing interim progress towards target achievement. The current targets for all measures are listed in MTP 2052 and updated targets will be available via plan amendment when they are established.

Relationship of TIP to Performance Measures and Targets

The RPC aims to achieve the targets described above through implementation of the projects listed in the TIP. As described previously each project is selected through careful analysis of its anticipated impacts to the safety, efficiency, effectiveness, and preservation of the regional transportation system. Each project listed in the TIP therefore contributes to the achievement of one or more targets, and each has been categorized to identify its relationship to the performance measure policy areas: Motorized Safety; Non-motorized Safety; Vehicle Congestion; Freight Vehicle Congestion; and State of Good Repair. Similar to the review of MTP Priorities, each project is evaluated by RPC staff to determine its contribution to achieving the PBPP targets using a form within the RPC's project tracking database that includes the following prompts:

- Safety Motorized: Does this project aim to reduce transportation system fatalities or use safety funding sources?
- Safety Non-Motorized: Does this project repair, improve, or add facilities to enhance non-motorized safety?
- State of Good Repair Road: Does this project reconstruct or rehabilitate an existing roadway?
- State of Good Repair Bridge: Does this project reconstruct or rehabilitate an existing bridge?
- **Reliability Congestion:** Does this project reduce travel time, reduce vehicle miles traveled, or address other congestion management issues?
- **Reliability Freight:** Does this project improve known freight bottlenecks, intermodal connection, or goods movement on the NHS or interstate highway?

Every project in the TIP falls into one or more categories, and when viewed together they illustrate how the program of projects will achieve the established targets. The total number of projects and expenditures per performance measure category are shown below, and each project page in the TIP indicates the Performance Measure Category to which that project contributes. It is important to note that many projects contribute to more than one category. For example, projects that contribute to improved system performance may also improve freight movements. Individual project descriptions in the TIP note the Performance Measure Categories to which that project contributes.

Mandeville-Covington Urbanized Area Projects' Contributions to Performance Measure Categories

Performance Measure Category	Federal Funding Contributing to Category		Percentage of Federal Funding Contributing to Category	Number of Projects Contributing to Category	Percentage of Projects Contributing to Category
Safety - Motorized	\$	55,726,840.00	71%	7	32%
Safety - Non-Motorized	\$	2,932,838.00	4%	4	18%
Road Condition	\$	49,771,800.00	64%	7	32%

Bridge Condition	\$ 44,527,560.00	57%	2	9%
System Performance	\$ 71,194,678.00	91%	15	68%
Freight Movement	\$ 45,439,800.00	58%	4	18%

It should also be noted that there are approximately 100 miles of NHS roadways in the MPA, and of these approximately 5 miles (5%) are locally-owned. The locally-owned NHS routes in the Mandeville-Covington MPA are Causeway Blvd. (3.3 miles), E. Causeway Approach (0.9 mile), and W. Causeway Approach (0.6 mile). Projects in the TIP each describe the performance measure targets to which they contribute, and projects on locally-owned NHS routes can be expected to have similar impacts on target achievement as projects on state-owned NHS routes.

It can similarly be demonstrated how much of RPC's annual FTA urbanized apportionment, and what percentage of total transit funding, is dedicated to state of good repair by asset category. These relationships are noted in the far right column of the Transit TIP, noting whether a project will contribute toward each asset target (RS: Rolling Stock; EQ: Equipment; FA: Facilities; IN: Infrastructure). Below are summaries of expenditures by asset category for the FY 23-26 TIP. NOTE: These figures are subject to change. Note that transit performance measures and projects in the TIP include all of St. Tammany Parish transit, encompassing both the Mandeville-Covington and Slidell UZAs.

Asset Category	Cost	% of Expenditures	Projects	% of All Projects
Rolling Stock	\$3,375,000	13%	8	50%
Equipment	\$0	0%	0	0%
Facilities	\$0	0%	0	0%
Infrastructure*	\$0	0%	0	0%
Total SGR	\$3,375,000	13%	8	50%

* The Infrastructure Asset category only applies to providers of rail transit. RTA is the sole operator of rail transit in the region.

The figures above demonstrate that the projects in the TIP can be expected to contribute to achievement of both highway and transit performance measures. As they are implemented over the next four Federal Fiscal Years the region should make measurable progress towards meeting its goals. This progress will be monitored by the RPC and tracked through multiple mechanisms, including the Annual Listing of Obligated Projects, the RPC Annual Report which summarizes federal performance measures, and the Congestion Management Process System Performance Report. This document contains all regionally significant projects requiring action by the FHWA or FTA whether or not the projects are to be funded under Title 23 USC Chapters 1 and 2 or Title 49 USC Chapter 53, pursuant to 23 CFR 450.324(f)(3).

Description of Project Lists

The TIP describes projects under multiple categories, each listed separately in the Appendices:

- Appendix C includes projects obligated for construction under the previous TIP (FFY 2019-2022).
- Appendix D lists DOTD Line Items, which describe broad funding categories that will fund projects that are not considered to be of appropriate scale for individual identification by DOTD. These categories and the funding amounts are determined by DOTD and provided directly to the RPC during the TIP development process.
- Appendix E lists transit projects and project categories to be funded through FTA and local sources.
- Appendix F lists individual highway projects to be funded through FHWA, state, local, and other sources as identified on each project page.

Technical Advisory Committee

Michael Albert	St. Charles Parish; Director, Planning and Zoning
Theresa Alexander	City of Slidell; Director of Planning
Renee Amar	Louisiana Motor Transportation Association; Executive Director
Tina Athalone	DOTD; Urban Transit Program Manager
Naketah Bagby	City of Covington; Director, Planning
Bridget Bailey	Tangipahoa Parish; Director, Planning
Callie Baker	City of Covington; City Engineer
Ninette Barrios	Jefferson Parish; Director, Transit Administration
Isabel Barrios	Greater New Orleans Foundation; Program Officer for Metro Opportunities
Cara Bartholomew, AICP	City of Mandeville; Director, Planning and Development
Mike Bayham	St. Bernard Parish; Transit Manager - SBURT
Ryan Benton	Center for Planning Excellence; Project Manager
Miles Bingham	St. Charles Parish; Director, Public Works
Erin Bivona	City of Covington; Administrative Officer
Scott Boyle	DOTD; Assistant District Administrator - District 02
Jennifer Branton	DOTD; Assistant District Administrator - District 62
Lauren Brinkman	City of Hammond; Planning
Joseph Brown	DOTD; Urban Systems >200k Program Manager
Tomeka Watson Bryant	New Orleans Public Belt Railroad; General Manager
Juliette Cassagne	Jefferson Parish; Parish President's Office - Land Use and Development
Mary Chimento	St. Bernard Parish; Planner, Community Development

Brandy Christian	New Orleans Port Authority; President and CEO
Blaine Clancy	City of Slidell; Director, Engineering
Chris Davis	City of Covington; Director, Public Works
Angela DeSoto	Jefferson Parish; Director of Engineering
Kevin Dolliole	New Orleans Aviation Board; Director of Aviation
Mark Drewes	Jefferson Parish; Director, Public Works
Wendell Dufour	City of Kenner; Director, Planning
Carlton Dufrechou	Greater New Orleans Expressway Commission; General Manager
Ken Dugas	Plaquemines Parish; Parish Engineer
Mary Elliot	DOTD; Transportation Planning Administrator
Matthew Falati	St. Bernard Parish; Director, Public Works
"Snookie" Faucheux	St. John the Baptist Parish; Director, Public Works
Perry Felarise	St. Tammany Parish; Grants Project Manager-Transit
Deshanda Firmin	St. John the Baptist Parish; Chief Administrative Assistant
Michelle Gonzales	Jefferson Parish; Director, Ecosystem and Coastal Management
Jose Gonzalez	Jefferson Parish; Director, Public Works
David Green	Lighthouse Louisiana; Representative
Lona Hankins	RTA; Deputy CEO, Planning & Infrastructure
Lona Hankins	RTA; Chief of Infrastructure and Planning
Gina Hayes	St. Tammany Parish; Chief Operating Officer
Louis Haywood	City of New Orleans; Mobility & Safety Division, Public Works
Jenice Heck	Lighthouse Louisiana; Chief Operating Officer

Ronisha Hodge	Federal Transit Authority Region VI; Community Planner
Kristi Bennett-Holmes	New Orleans Aviation Board; Deputy Director
Katherine Hoover	AARP; Volunteer
Michelle Horn	DOTD; Public Transportation Administrator
Earl Randall III	FHWA; Field Office Director New Orleans
Beth Inbau	National Safety Council; President and CEO - South Louisiana Chapter
Courtney Jackson	Ride New Orleans ; Executive Director
Dan Jatres	City of New Orleans; Infrastructure Program Manager, Office of Resilience & Sustainability
Megan C. Jenkins	St. John the Baptist Parish; Executive Assistant to the Parish President
Russell Johnson	Tangipahoa Parish; Parish Engineer

Joint Certification of the Metropolitan Planning Process

The Regional Planning Commission hereby certifies that the transportation planning process is addressing the major issues facing the Mandeville-Covington and Slidell Urbanized Areas and is being conducted in accordance with all applicable requirements of:

- 1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
- In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
- 3. Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- 5. Section 1101(b) of the FAST Act (Pub. L. 114-94) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in US DOT funded projects;
- 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- 7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- 9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- 10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Shawn Wilson, Secretary Louisiana Department of Transportation and Development

Appendix E: Transit Projects

Note 1: The Transit TIP for the Mandeville-Covington and Slidell Urbanized Areas are combined into a single set of projects for both of St. Tammany Parish's Urbanized Areas.

Note 2: The "Comment" field in the Transit TIP indicates the state of good repair asset management category to which a project contributes. The abbreviations for categories are as follows:

- RS: Rolling Stock
- EQ: Equipment
- FA: Facilities
- IN: Infrastructure (applies to rail infrastructure only; RTA is the sole operator of rail transit in the region)
