New Orleans Urbanized Area TIP FFY 23-26

Introduction

The Transportation Improvement Program (TIP) is adopted every four years by the Regional Planning Commission (RPC). This document is prepared cooperatively by the RPC, acting in its legal capacity pursuant to 23 CFR 450 as the Metropolitan Planning Organization for the New Orleans Urbanized Area, and the Louisiana Department of Transportation and Development (DOTD) and affected transit operators. The TIP consists of a priority list of projects that are being advanced toward construction over the four-year period from Federal Fiscal Year 2023 to Federal Fiscal Year 2026. Projects found in the TIP have evolved through the transportation planning process and are contained in the region's long-range Metropolitan Transportation Plan (MTP). The RPC reviews the TIP annually and selected revisions are permitted, following formal amendment procedures. The TIP may be viewed on RPC's website at www.norpc.org.

Both the local TIP and State TIP (STIP) are identical documents containing a common set of projects proposed for federal funding. The TIP and STIP are products of a consensus building process carried out jointly by the RPC and DOTD, and both are on a four-year update cycle.

Candidate projects for MTP and TIP consideration come from various sources, including RPC's public outreach initiative, input from business, civic, and community organizations, state and local governmental entities, and other transportation stakeholders. Projects are first screened by RPC for technical merit and consistency with the region's adopted transportation goals and the ten planning factors which guide the implementation of the nation's transportation bill, the FAST Act of 2015 and its successor legislation, the Infrastructure Investment and Jobs Act of 2021 (IIJA, also known as the Bipartisan Infrastructure Law (BIL)) ¹. Following the initial project screening process, potential projects are accepted into the MTP for further evaluation and refinement. During the planning phase, projects undergo a series of rigorous technical analyses to determine overall feasibility, environmental consequences, project costs, and potential funding sources before being advanced into final design, project letting, and construction implementation.

Citizens, affected public agencies, private transportation providers, and other interested parties are invited to review and comment on the document. Comments and questions should be directed to the attention of:

Jason Sappington
Deputy Director
504-483-8500
jsappington@norpc.org
10 Veterans Memorial Boulevard
New Orleans, LA 70124-1162

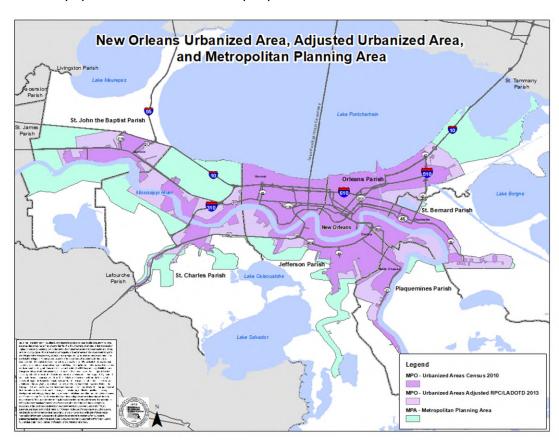

¹ IIJA was passed in 2021, and some final rules were still pending as of the writing of this document. The RPC will continue to update its planning processes and associated documents as necessary pending the release of final rules.

The New Orleans Urbanized Area

The Urbanized Area (UZA) is comprised of a historically significant central city surrounded by smaller municipalities and contemporary suburban areas. The Metropolitan Planning Area (MPA) encompasses the UZA as well as the portion of the region that is expected to become urbanized in the next 20 years and which the RPC must consider in its transportation planning process. It stretches as far upriver as St. Charles and St. John the Baptist Parishes, to the southern shores of Lake Pontchartrain in Jefferson and Orleans Parish, and downriver into St. Bernard and Plaquemines Parishes. The borders encompass all or part of these six parishes which, in 2019, the MPA had an estimated total population of over 990,000 people².

The RPC is responsible for regional transportation planning and federally-funded project programing for the region's transportation system, which includes:

- Approximately 1,900 miles of Federal Aid eligible roadways.
- Five transit operators that provide over 20 million trips a year to passengers.
- Over 200 miles of on- or off-street bikeways.
- Four seaports.
- Six Class I railroads, in addition to the New Orleans Public Belt Railroad, which serves as a terminal switching entity on 27 miles of track along the Mississippi River.
- Amtrak and intercity bus operations.
- One major international airport and one public general aviation airport.

² American Community Survey (ACS) 5 Year Summary File (2015-2019), Published December 2020 by U.S. Census Bureau.

TIP Development

The projects contained in the TIP are derived from the region's overall 30-year MTP. Both the TIP and MTP have been fiscally constrained (based on past funding history) to reflect realistic and available levels of project funding. Projects shown in the TIP for advancement were fully discussed with the RPC Technical Advisory Committee, DOTD, and local transit providers prior to placement in the TIP. Only projects which were mutually agreed upon by these stakeholders as to overall merit and funding availability were selected for TIP and STIP inclusion. The TIP also contains a list of all highway and transit projects obligated for implementation as part of the previous TIP (FFY 19 through FFY 22).

Planning Process

Moving from planning to project implementation requires evaluating the feasibility of potential system improvements, and a means by which to prioritize projects. Though the process of identifying, developing, and implementing projects is complex, it can be summarized in the following steps:

- 1. Identify Opportunities for Improvement: Most projects begin with the identification of an opportunity to change the transportation system in a way that will better serve the region. For example, there may be a problem that needs to be solved such as congestion at a major intersection, or there may be an unmet need that can be addressed, such as increasing non-motorized access to a neighborhood. Such opportunities are identified through a wide variety of sources, including public engagement, input from elected officials, RPC's planning programs, and staff expertise.
- 2. Study Potential Options: Once an opportunity for change has been identified the RPC studies how it can be accomplished through modifications to the transportation system. For example, if there is a need to reduce crashes at a particular location, can that be done through infrastructure improvements, operational changes, or other alterations? The timeline and level of effort required for such studies depend on the complexity of the issue and its potential impacts on the community.
- 3. Define Projects: The previous two steps result in recommendations for real-world projects that will improve the transportation system. Once a potential project has been defined, further refinements are completed as necessary. It should be noted that there is no single list of potential projects developed at one point in time from which the RPC chooses projects to be included in the MTP or TIP. Rather, projects are developed on an ongoing basis using a continuing, comprehensive, and cooperative ("3C") process which acknowledges that individual projects and their sponsors require differing timelines and development tasks to reach implementation readiness.
- **4. Fund and Prioritize Projects**: After a project has been defined, the RPC determines how it may be funded and how its implementation will be prioritized among the many other projects within the RPC's program. Project prioritization depends on multiple interrelated factors, including stakeholder support, potential impact and need, and funding availability.

RPC Programs

The steps described above are accomplished through the ongoing implementation of multiple RPC processes and programs. While these efforts are described separately below, the RPC recognizes that the region's transportation network is an integrated system, and accordingly conducts holistic planning efforts that utilize best available practices, methods, and technologies.

- Public Transit & Human Services: The New Orleans UZA accounts for by far the largest share of transit ridership in the state of Louisiana, and the RPC places a priority on enhancing the quality of public transit service in the region. The RPC provides planning and technical support to fixed-route transit operators as they have prioritized increasing regional transit integration, modernizing fleets, and redesigning the regional bus and streetcar network to improve service frequency and access to destinations. RPC's Coordinated Public Transit-Human Services Program is complementary to its transit planning program, and focuses on serving the needs of low-income, elderly, and disabled populations in the region. It is guided by the Coordinated Public Transit-Human Services Plan, most recently updated in 2020, which outlines regional needs and presents a series of goals, objectives and strategies for serving vulnerable populations.
- Walking and Biking: Facilitating safe walking and biking is integral to RPC's planning process, and the potential for adding or enhancing non-motorized facilities is considered during the development of all projects. In addition to considering the needs of people walking and biking at the project level the RPC also continues to engage in larger-scale programs intended to increase the use of non-motorized modes across the region. The agency works to accomplish this with data-driven analysis and decision-making; planning and design for comprehensive land use and sustainable transportation; and a range of educational and outreach tools.
- Roads, Highways, and Bridges: Maintaining and improving the region's roads and highways has been a central concern of
 the RPC since its creation. Ensuring that drivers can expect reliable travel times on roads and bridges that are in a state of
 good repair will continue to be a primary focus for the transportation planning process.
 - Congestion Management: Much of the RPC's work regarding travel reliability for motor vehicles centers on the Congestion Management Process (CMP), an ongoing series of activities that identifies traffic congestion throughout the region, defines needs related to congestion reduction, and recommends congestion mitigation strategies. The Process was updated in 2021 and includes a System Performance Report that describes overall congestion on the many of the region's most significant corridors. The strategies identified in the CMP are summarized below, and the Screening and Prioritization of Projects section of the TIP further describes how individual projects are related to the CMP.
 - Transportation Systems Management and Operations (TSMO) strategies can enhance the efficiency of the transportation system through improved operations and management, often without major infrastructure

- investments. TSMO strategies can include Access Management, Operations Management, Incident Management, and Intelligent Transportation Systems.
- Travel Demand Management (TDM) strategies take many forms, but all have the general goal of reducing the need to travel by Single Occupant Vehicle (SOV). TDM strategies can include: HOV usage; alternative work arrangements such as work from home or non-traditional hours; parking supply and pricing management; and alternative transportation modes such as public transit, walking, biking, and rideshare.
- Roadway capacity increases physically expand the roadway to create space for more vehicles. While they are often seen as a primary tool for reducing congestion, they can be less effective and more costly than other strategies. As such the CMP encourages the consideration of other strategies before increasing capacity. However, capacity increases are sometimes appropriate and necessary, and the RPC carefully considers where and how they should be implemented.
- State of Good Repair: The RPC evaluates the need for roadway maintenance and repair through two primary mechanisms: quantitative performance measures and stakeholder input. Road and bridge conditions are two of the federally-required performance measures tracked by the RPC, further discussed in the Performance Based Planning and Programming section below. The measures provide both an overview of regional conditions as well as conditions on specific roadways. The RPC receives further detail about which roadways should be prioritized for repair from local and state partners, who are encouraged to utilize the RPC's resources to maintain the system in a state of good repair.
- Freight: MPOs are not required to develop a regional Freight Mobility Plan; however, the centrality of freight to the region's economy and the significance of the region to national freight networks point to the need for a deliberative freight planning process. The regional Freight Mobility Plan, developed concurrently with the TIP and MTP, will guide the RPC Freight Program and inform the overall planning process. In addition to broad policy goals, the Freight Mobility Plan describes processes for project evaluation and implementation as well as recommendations for projects and studies that will improve freight movement throughout the region. With its completion the RPC has established a vision and process for considering freight needs and identifying necessary improvements.
- Safety: The RPC continues to integrate safety within all projects and programming to reduce fatalities and serious injuries. Safety goals for the RPC are closely linked to Louisiana's Strategic Highway Safety Plan (SHSP), a data-driven approach led in part by DOTD. In addition, the U.S. Department of Transportation (DOT) has formally committed to the long term goal of reducing road fatalities to zero, the only acceptable number. This commitment is part of a new strategy to implement the National Roadway Safety Strategy (NRSS), which outlines the USDOT's comprehensive approach to significantly reduce deaths and serious injuries to zero on our nation's roadways. The NRSS adopted the Safe System approach, which was

founded on the principles that humans make mistakes and that human bodies have limited ability to tolerate crash impacts. The RPC is committed to this approach and addressing traffic safety as a public health issue. Each project introduces opportunities to evaluate crash histories and unsafe conditions, and to identify modifications that will reduce injuries and fatalities.

• Transportation Resilience: As the need to protect the community against hazardous events becomes increasingly apparent the RPC has begun building a transportation resilience planning program. As the RPC seeks to enhance the resilience of the system itself it will also need to carefully consider how those improvements can most effectively benefit the community. The IIJA includes important provisions that will help guide the RPC's work. In particular, it describes optional Resilience Improvement Plans that may be developed by MPOs. These plans will provide a systemic approach to addressing transportation vulnerabilities and identify potential courses of action for improving regional resilience. The RPC intends to create a Resilience Improvement Plan when full guidance becomes available, likely in the fall of 2022, and will incorporate its recommendations into the larger planning process.

Each of the programs described above directly contributes to development of the TIP. They direct RPC staff to identify opportunities for improvement, define specific concerns to be studied, and recommend strategies to be incorporated into projects to address program-related needs. They also offer insight into how projects should be prioritized by providing RPC staff with data and clearly defined objectives against which projects can be evaluated.

Fiscal Constraint

Both the TIP and MTP have been fiscally constrained to reflect realistic and available levels of project funding. Projected future funding levels are based on past funding trends as well as ongoing coordination with DOTD, transit operators, and local partners. The federal funding available to the New Orleans MPA and transit operators is determined by formula outlined in federal legislation, and specific amounts available are communicated to the RPC by DOTD on a regular basis, at least once per fiscal year. Further, RPC and DOTD conduct project reviews (termed "whiteboard meetings") to periodically review the program and make adjustments based on implementation progress. This ongoing process allows the RPC to develop an average estimated amount of both federal and non-federal financial resources that can be used as a benchmark in the prioritization process.

Over time the region has experienced an overall increase in construction spending due to improved coordination of the planning and programming efforts of RPC and DOTD. Fiscal constraint has resulted in a goals-oriented approach emphasizing traffic safety, transit reliability, and roadway system preservation.

Projects identified for National Highway Performance Program (NHPP) funding are part of DOTD's Priority Program and have been approved by the RPC. The NHPP funds shown in the TIP are primarily directed toward the elimination of traffic congestion, particularly on interstates and other major federal and state routes. Projects shown for Surface Transportation Program funding

(STP>200K) for urbanized areas greater than 200,000 in population are also fiscally constrained, reflecting the annual attributable amount plus 20% local (non-federal) match. The region has a positive balance of attributable funds that may be utilized on occasion to cover an increase in project costs due to environmental, construction or right-of-way needs. Further details on highway projects funded through the Surface Transportation Block Grant (STBG) program can be seen in Appendix B.

On the transit side, the majority of project funding is based on Section 5307 formula funds which are listed annually in the *Federal Register*. Under the FAST Act and its preceding legislation MAP-21, Section 5307 funding has averaged about \$14 million annually for the New Orleans urbanized area. Additional support comes from Section 5339 funds for bus and bus facility replacement or rehabilitation, and Section 5337 for fixed guideway (streetcar and dedicated bus lane) improvements. These funds are programmed based on current or pending Congressional authorizations. Matching funds for transit projects come from dedicated revenue sources, such as a 1% sales tax and a percentage of the Hotel/Motel Tax in Orleans Parish, and a property tax millage in Jefferson Parish.

The FY 2023-2026 does not include funding sources that were not also available for the previous TIP (FFY 2019-2022). However, it is expected that the IIJA will introduce multiple new funding sources that the region may use in future projects. As guidance for these funds and associated programs continues to be promulgated, the RPC will consult with DOTD, local partners, and federal agencies to determine appropriate action for incorporating them into the TIP. It is anticipated that while the IIJA has introduced many new programs the overall process for determining available funding levels and ensuring fiscal constraint will remain similar to current practice.

Distribution of Document for Public Review

Copies of the draft TIP are placed at libraries throughout the metropolitan region and posted online at www.norpc.org for citizen review, input and comment. The public is also afforded the opportunity to express their comments directly to the Transportation Policy Committee (TPC) at a meeting prior to official action on the TIP document. Consistent with RPC's Public Involvement Plan, RPC provided a 30 day public comment period for review of the draft FY23-26 TIP, from August 12, 2022 to September 13, 2022. During this time the document was available for review and comment on the RPC website, at public libraries throughout the region, and by request. This availability was announced on the website as well as in two public notices in *The Times Picayune | The New Orleans Advocate*.

September 13, 2022 was the end date for public comment, as well as the date of the regular TPC meeting. During this meeting time was made for additional public comment on the TIP. Notice of the meeting was given through the methods described above, as well as through the standard notice which is placed in the newspaper one week prior to every RPC Board meeting. This meeting takes place at the Regional Transportation Management Center, a facility that is ADA accessible and is close to bus stops on both the New Orleans Regional Transit Authority's 45 (Lakeview) route and the Jefferson Transit's E1 (Veterans Blvd) route. No comments were received on the TIP during this review period. Appendix A includes minutes from the TPC meeting of September 13, 2022, at which the TIP was approved, and the TPC meeting of October 11, 2022, at which the previous meeting's minutes were approved.

Screening and Prioritization of Projects

Once potential projects have been identified they are screened and prioritized based on three primary mechanisms: project readiness and stakeholder input; support of the regional priorities established in the MTP; and contribution to the achievement of specified performance measure targets. These mechanisms are interrelated and their impacts on project selection and prioritization vary from project to project.

The process for determining a project's readiness, its support of the MTP, and its contribution to achieving targets is summarized below. The RPC's overall process for selecting and prioritizing projects has remained relatively stable since the previous TIP, though specific programmatic recommendations have evolved over time. These updates, and the planning process in general, are more thoroughly described in the MTP. Additional information about how individual RPC programs impact project development and selection can be found in the CMP, the Regional Freight Mobility Plan, the Unified Planning Work Program, and other planning documents available on the RPC's website (www.norpc.org).

Project Readiness

The RPC works very closely with DOTD staff and local parish Departments of Public Works (DPW's) to establish realistic project priorities, based on where the project actually rests in the implementation pipeline. Meetings are held at least quarterly with DOTD to monitor the actual status of TIP projects and scheduled letting dates. This periodic review has helped the region to establish firm project priorities rather than "paper" priorities. The review considers important factors such as the status of environmental clearances, survey work, preliminary plans, right-of-way, utilities, advance check prints and final plan preparation. When taken together, these criteria establish the relevant let date and, therefore, the priority order for implementation of TIP projects. The cost of the project, type of funding, and the availability of proposed funding are also considered in priority setting. The above project level information is made available to the Technical Advisory Committee, or the general public upon request, and project work status is utilized extensively in establishing the priority program. The draft TIP is also presented to the Transportation Policy Board for review and input, along with any citizens' comments received, prior to finalization of priorities.

Relationship to MTP

Projects in the MTP are selected through a consultative process with the state, local transit operators, and the region's Transportation Policy Board. This process is further informed by the various RPC programs described in the previous section. Following inclusion in the MTP, projects are advanced into the TIP based on their need or merit and the ability of the state and region to finance the improvement. As such, projects contained in the TIP are a result of the region's transportation planning process and are supportive of the planning Priorities identified in the MTP: Resilience & Sustainability; Equity; Economic Opportunity; Access & Mobility; Safety & Security; and Stewardship.

Prior to inclusion in the MTP or TIP each project is reviewed by RPC staff to determine its relationship to the regional Priorities. All projects must contribute to at least one MTP Priority to be included in the MTP or TIP, and most projects contribute to more than one Priority. Projects are categorized using a form within the RPC's project tracking database that consists of the following prompts:

- Safety & Security: Does this project incorporate safety improvements designed to decrease risk for transportation system users?
- **Sustainability & Resilience:** Does this project minimize negative environmental impacts while enhancing the region's ability to withstand and recover from natural hazards?
- **Equity:** Does this project improve quality of life for disadvantaged communities as well as benefit the entire regional population?
- **Economic Opportunity:** Does this project provide residents with access to employment, facilitate the movement of goods, and connect businesses with customers?
- Reliability & Connectivity: Does this project improve travel time reliability for all system users or improve multimodal connectivity?
- **Preservation & Stewardship:** Does this project maintain or enhance functionality of the existing infrastructure for transportation system users?

The number of projects contributing to each Priority is described in the table below and each project page in the TIP indicates the MTP Priorities to which that project is related.

New Orleans Urbanized Area TIP Projects' Contribution to MTP Priorities

MTP Priority	Number of Projects Contributing to Priority	Percentage of Projects Contributing to Priority
Safety & Security	53	50%
Sustainability & Resilience	36	34%
Equity	32	30%
Economic Opportunity	16	15%
Reliability & Connectivity	39	36%
System Preservation & Stewardship	51	48%

By implementing a program of projects that have each been determined to contribute to the MTP Priorities it can be expected that over the next four Federal Fiscal Years the region will incrementally advance progress towards addressing the Priorities. Individual project descriptions in the TIP note the MTP Priorities to which that project contributes. This information can also be used to determine which RPC programs relate to each project. For instance, projects that contribute to the Reliability and Connectivity Priority incorporate congestion mitigation strategies identified in the CMP.

Performance Based Planning and Programming

Performance Based Planning and Programming (PBPP) is an approach adopted by the Federal Highway Administration (FHWA), Federal Transit Administration (FTA), state DOTs, transit agencies, and MPOs to use quantitative data and other information to strategically direct transportation decision-making. PBPP is a systematic, evidence-based approach to integrating data into the transportation planning process at all levels, from concept to design and implementation. It is important to note that PBPP is not intended to supplant the decision-making roles and responsibilities of the general public, elected officials, or technical experts.

The use of PBPP by MPOs is formally codified by the FAST Act (23 CFR Part 490), which requires MPOs and State DOTs identify quantitative targets for several performance measures within four key policy areas: safety; infrastructure condition; system performance and freight; and Congestion Mitigation Air Quality (CMAQ). The specific performance measures and their applicability to the RPC are listed below. All performance measures consider the entire MPA; however, the infrastructure condition, system performance, and freight measures only evaluate performance on the Interstate and non-Interstate National Highway System (NHS).

Federally Required Performance Measures

Safety		
Number of fatalities		
Fatalities per million VMT		
Number of serious injuries		
Serious injuries per million VMT		
Number of non-motorized fatal	ities and non-motorized serious injuries	
Pavement & Bridge Conditio	n	
Percentage of Interstate pavement in good condition		
Pavement	Percentage of Interstate pavement in poor condition	
	Percentage of non-Interstate NHS in good condition	

	Percentage of non-Interstate NHS in poor condition		
Dridge	Percentage of NHS bridges in good condition		
Bridge	Percentage of NHS bridges in poor condition		
System Performance & Freig	yht		
System Performance	Interstate Travel Time Reliability (TTRM): percentage of person-miles traveled on the interstate that are reliable		
System Performance	Non-Interstate Travel Time Reliability (TTRM): percentage of person- miles traveled on the non-Interstate NHS that are reliable		
Freight Truck Travel Time (TTTR) Reliability Index: percentage of truck mile traveled on the interstate that are reliable			
CMAQ*			
Troffic Congostion	Peak Hour Excessive Delay (PHED)		
Traffic Congestion	Non-single Occupancy Vehicle Travel		
On-road Mobile Source Emissions	Total Emissions Reductions		
Transit Asset Management			
Rolling Stock	Percentage of Inventory Exceeding Useful Life		
Equipment	Percentage of Inventory Exceeding Useful Life Benchmark		
Facilities	Percentage of Inventory exceed 2.5 on TERM scale		
Infrastructure	Performance of Track Segment with Performance Restrictions		

^{*} Federal regulations require that CMAQ performance measure targets shall be set by MPOs that contain area(s) designated as nonattainment or maintenance for ozone (O3), carbon monoxide (CO) or particulate matter (PM10 and PM2.5) National Ambient Air Quality Standards (NAAQS). There are currently no areas served by the RPC that meet any of these criteria.

For Safety, Pavement and Bridge Condition, System Performance and Freight, and CMAQ, DOTD is required to establish targets for each measure; the RPC may choose to develop its own targets or adopt those of the state. For Transit Asset Management measures, the region's transit providers establish their own targets and the RPC, in coordination with the providers, develops regional targets. Implementation of the performance measure requirements began in 2018 and the initial round of targets were detailed in the previous MTP, adopted in January 2019. Safety performance targets are required to be updated annually, and the RPC has done so via MTP amendment each year since 2019. All other performance measures are updated every four years, which means the next round of targets will be included as an amendment to MTP 2052 in early 2023. Additionally, the

RPC publishes an annual report each year describing interim progress towards target achievement. The current targets for all measures are listed in MTP 2052 and updated targets will be available via plan amendment when they are established.

Relationship of TIP to Performance Measures and Targets

The RPC aims to achieve the targets described above through implementation of the projects listed in the TIP. As described previously each project is selected through careful analysis of its anticipated impacts to the safety, efficiency, effectiveness, and preservation of the regional transportation system. Each project listed in the TIP therefore contributes to the achievement of one or more targets, and each has been categorized to identify its relationship to the performance measure policy areas: Motorized Safety; Non-motorized Safety; Vehicle Congestion; Freight Vehicle Congestion; and State of Good Repair. Similar to the review of MTP Priorities, each project is evaluated by RPC staff to determine its contribution to achieving the PBPP targets using a form within the RPC's project tracking database that includes the following prompts:

- Safety Motorized: Does this project aim to reduce transportation system fatalities or use safety funding sources?
- Safety Non-Motorized: Does this project repair, improve, or add facilities to enhance non-motorized safety?
- State of Good Repair Road: Does this project reconstruct or rehabilitate an existing roadway?
- State of Good Repair Bridge: Does this project reconstruct or rehabilitate an existing bridge?
- Reliability Congestion: Does this project reduce travel time, reduce vehicle miles traveled, or address other congestion management issues?
- Reliability Freight: Does this project improve known freight bottlenecks, intermodal connection, or goods movement on the NHS or interstate highway?

Every project in the TIP falls into one or more categories, and when viewed together they illustrate how the program of projects will achieve the established targets. The total number of projects and expenditures per performance measure category are shown below, and each project page in the TIP indicates the Performance Measure Category to which that project contributes. It is important to note that many projects contribute to more than one category. For example, projects that contribute to improved system performance may also improve freight movement.

New Orleans Urbanized Area Projects' Contributions to Performance Measure Categories

Performance Measure Category	Federal Funding Contributing to Category	Percentage of Federal Funding Contributing to Category	Number of Projects Contributing to Category	Percentage of Projects Contributing to Category
Safety - Motorized	\$ 8,788,600.00	2%	8	7%
Safety - Non-Motorized	\$49,606,462.74	13%	35	33%
Road Condition	\$ 150,181,246.00	40%	41	38%
Bridge Condition	\$ 148,479,424.00	39%	10	9%
System Performance	\$71,131,994.00	19%	33	31%
Freight Movement	\$18,433,800.00	5%	9	8%

Individual project descriptions in the TIP note the Performance Measure Categories to which that project contributes. As with MTP Priorities, this information can be used to determine which RPC programs relate to each project. For instance, projects that contribute to the System Performance and/or Freight Movement targets incorporate congestion mitigation strategies identified in the CMP.

It should also be noted that there are approximately 693 miles of NHS roadways in the MPA, and of these approximately 60 miles (9%) are locally-owned. The specific locally-owned NHS roadways and their lengths are identified in Appendix C. Projects in the TIP each describe the performance measure targets to which they contribute, and projects on locally-owned NHS routes can be expected to have similar impacts on target achievement as projects on state-owned NHS routes.

It can similarly be demonstrated how much of RPC's annual FTA urbanized apportionment, and what percentage of total transit funding, is dedicated to state of good repair (SGR) by asset category. These relationships are noted in the far right column of the Transit TIP, noting whether a project will contribute toward each asset target (RS: Rolling Stock; EQ: Equipment; FA: Facilities; IN: Infrastructure). Below are summaries of expenditures by SGR asset category for the FY 23-26 TIP. NOTE: These figures are subject to change.

Asset Category	Cost	% of Expenditures	Projects	% of All Projects
Rolling Stock	\$ 110,062,723.75	69.0%	38	38.0%
Equipment	\$ 400,000.00	0.3%	3	3.0%
Facilities	\$ 15,013,750.00	9.4%	14	14.0%
Infrastructure*	\$ 1,837,500.00	1.2%	4	4.0%
Total SGR	\$ 127,313,973.75	79.8%	59	59.0%

^{*} The Infrastructure Asset category only applies to providers of rail transit. RTA is the sole operator of rail transit in the region.

The figures above demonstrate that the projects in the TIP can be expected to contribute to achievement of both highway and transit performance measures. As they are implemented over the next four Federal Fiscal Years the region should make measurable progress towards meeting its goals. This progress will be monitored by the RPC and tracked through multiple mechanisms, including the Annual Listing of Obligated Projects, the RPC Annual Report which summarizes federal performance measures, and the Congestion Management Process System Performance Report. This document contains all regionally significant projects requiring action by the FHWA or FTA whether or not the projects are to be funded under Title 23 USC Chapters 1 and 2 or Title 49 USC Chapter 53, pursuant to 23 CFR 450.324(f)(3).

Description of Project Lists

The TIP describes projects under multiple categories, each listed separately in the Appendices:

- Appendix D includes projects obligated for construction under the previous TIP (FFY 2019-2022).
- Appendix E lists DOTD Line Items, which describe broad funding categories that will fund projects that are not considered to be of appropriate scale for individual identification by DOTD. These categories and the funding amounts are determined by DOTD and provided directly to the RPC during the TIP development process.
- Appendix F lists transit projects and project categories to be funded through FTA and local sources.
- Appendix G lists individual highway projects to be funded through FHWA, state, local, and other sources as identified on each project page.

Joint Certification of the Metropolitan Planning Process

The Regional Planning Commission hereby certifies that the transportation planning process is addressing the major issues facing the New Orleans Urbanized Area and is being conducted in accordance with all applicable requirements of:

- 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
- In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
- Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- 5. Section 1101(b) of the FAST Act (Pub. L. 114-94) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in US DOT funded projects;
- 6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance:
- Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

2. Consideration: Amendment to the New Orleans Transportation Improvement

Program, Highway & Transit Elements (FFY 2019-2023)

3. Consideration: Amendment to the St. Tammany Transportation Improvement Program, Highway & Transit Elements (FFY 2019-2023)

Amendment to the Tangipahoa Transportation Improvement Program, Highway & Transit Elements (FFY 2019-2023)

5. Consideration: Approval of New Orleans UZA Transportation Improvement Plan (FFY 2023-2026)

6. Consideration: Approval of St. Tammany UZAs Transportation Improvement Plan (FFY 2023-2026)

7. Consideration: Approval of South Tangipahoa UZA Transportation Improvement Plan (FFY 2023-

8. Consideration: UPWP Amendment - HSIP Task

9. Consideration: Draft New Orleans Regional Freight Mobility Plan

By: Karen Parson, AICP Principal Planner, RPC

10. Consideration: Public Comment Period

11. Consideration: Other Matters

Mr. Jeff Roesel, RPC's Executive Director led everyone in the Pledge of Allegiance.

Following the roll call by Mr. Jason Sappington, RPC's Deputy Director, a quorum was established.

1. Consideration: Approval of August 9th 2022 minutes

Mr. Jeff Roesel asked the Board for a motion for the approval of the August 9th minutes. Mayor Bob Zabbia made a motion to approve the August 9th minutes, seconded by Ms. Ninette Barrios and approved unanimously by the Transportation Policy members in attendance, as noted by the Chairman.

2. Consideration: Amendment to the New Orleans Transportation Improvement Program, Highway & Transit Elements (FFY 2019-2022)

Mr. Jeff Roesel referred the members to page 5 of the meeting packet for the amendments to the New Orleans TIP, Highway & Transit Elements for FFY 2019-2022 and stated that the TIP is currently in effect through Federal fiscal year 22 and ends September 30, 2022.

There being no questions or objections, the Chairman called for a motion to approve the New Orleans TIP amendments for the Highway & Transit Elements FFY 2019-2022. It was so moved by Mr. Dan Jatres and seconded by Council Chair Bridgette Hyde and approved unanimously by the Transportation Policy members in attendance, as noted by the Chairman.

3. Consideration: Amendment to the St. Tammany Transportation Improvement Program, Highway & Transit Elements (FFY 2019-2022)

Mr. Jeff Roesel informed the members there are no amendments to the St. Tammany TIP, Highway & Transit Elements (FFY2019-2022)

4. Consideration: Amendment to the Tangipahoa Transportation Improvement Program, Highway & Transit Elements (FFY 2019-2022)

Mr. Jeff Roesel informed the members there were no amendments to the Tangipahoa TIP, Highway & Transit Elements for FFY 2019-2022.

2 | Page

Minutes for the TPC & RPC Meeting - September 13, 2022

5. Consideration: Approval of New Orleans UZA Transportation Improvement Plan (FFY 2023-2026)

Mr. Jeff Rossel referred the members for approval of the New Orleans MPA Metropolitan Transportation Plan 2052 and stated that the RPC staff submitted the draft TIP for the New Orleans Urbanized area (Southshore) in August and stated that the TIP is the programming document that reflects Tier 1 of the MTP and is the counterpart of the State Transportation Improvement Program of STIP and the TIPs are the documents that we amend as projects moved through the development process.

There being no questions or objections, the Chairman called for a motion to approve the New Orleans MPA Metropolitan Transportation Plan 2052. It was so moved by Ms. Sophie H. Vorhoff and seconded by Mr. Dan Jatres and approved unanimously by the Transportation Policy members in attendance, as noted by the Chairman.

Consideration: Approval of St. Tammany UZAs Transportation Improvement Plan (FFY 2023-2026)

Mr. Jeff Roesel referred the members for approval of the St. Tammany MPA Metropolitan Transportation Plan 2052 and stated that the RPC staff submitted the draft TIP for the St. Tammany Urbanized area in August and stated that the TIP is the programming document that reflects Tie I of the MTP and is the counterpart of the State Transportation Improvement Program of STIP and the TIPs are the documents that we amend as projects moved through the development process. Mr. Jeff Roesel also stated that the Federal law requires the TIP to be consistent with the State TIP and that we have consolidated the TIPs for the Mandeville-Covington and Shdell Urbanized areas to be consistent with DOTD's STIP.

There being no questions or objections, the Chairman called for a motion to approve the St. Tammany MPA Metropolitan Transportation Plan 2052. It was so moved by Councilmember T.J. Smith and seconded by Mayor Clay Madden and approved unanimously by the Transportation Policy members in attendance, as noted by the Chairman.

Consideration: Approval of South Tangipahoa UZA Transportation Improvement Plan (FFY -2023-2026)

Mr. Jeff Rossel referred the members for approval of the South Tangipahoa MPA Metropolitan Transportation Plan 2052 and stated that the RPC staff submitted the draft TIP for the Seuth Tangipahoa Urbanized area in August and stated that the TIP is the programming document that reflects Tier I of the MTP and is the counterpart of the State Transportation Improvement Program of STIP and the TIPs are the documents that we amend as projects moved through the development process.

There being no questions or objections, the Chairman called for a motion to approve the South Tangipahoa MPA Metropolitan Transportation Plan 2052. It was so moved by Parish President Robby Miller and seconded by Mayor Bob Zabbia and approved unanimously by the Transportation Policy members in attendance, as noted by the Chairman.

8. Consideration: UPWP Amendment - HSIP Task

Mr. Jeff Roesel referred the members to the handout and stated that staff is requesting an amendment to the Unified Planning Work Program (UPWP) that was reviewed and adopted back in April of this year and noted that RPC received word from FHWA that we needed to include the Task that's in the handout. This is the HSIP task that funds the Safety Coalition for the Northsbore and Southsbore.

There being no questions or objections, the Chairman called for a motion to approve the UPWP Amendment - HSIP Task. It was so moved by Mr. Carlton Dufferbou and seconded by Ms. Tomeka Bryant and approved unanimously by the Transportation Policy members in attendance, as noted by the Chairman.

9. Consideration: Draft New Orleans Regional Freight Mobility Plan By: Karen Parsons, AICP Principal Planner, RPC

Mr. Jeff Roesel informed the members that staff has submitted the draft of the Regional Freight Mobility Plan Board review. This has been reviewed and commented on by our Freight Roundtable' advisory committee. The freight plan is not statutorily required by FHWA or DOTD, however, given changes from the new IBA law, we believe it is strategically advantageous for the Board to review and formally adopt the freight plan. He also stated that, we believe that by doing so, projects and initiatives enumerated therein would be more competitive when discretionary funds are being sought. Nearly all the projects listed in this plan are also listed in the recently adopted MTP's for each of the UZA in our region, so there is consistency of policy between the two documents and stated that pending the board's review and comments, we will seek final adoption of this document at our October Commission meeting.

Mr. Jeff Roesel introduced Ms. Karen Parsons, RPC Principal Planner to provide a brief overview of the plan and the process of developing it.

For more information or a copy of the presentation please contact Ms. Karen Parsons- 504-483-8511 or kparson@norpc.org.

Minutes for the TPC & RPC Meeting - September 13, 2022

10. Consideration: Public Comment Period

Mr. Jeff Roesel asked if there were any public comments. There was none.

11. Consideration: Other Matters

Mr. Jeff Roesel wanted to recognize Ms. Sophie Harris Vorhoff, who will be leaving the Regional Planning Commission and would like to thank her for her services and wish her well in her future endeavors.

Mr. Jeff Roesel stated that our November RPC-TPC meetings will be cancelled because of Election Day.

There being no other matters to discuss, Mr. Jeff Roesel noted the quorum is still established, the Chairman proceeded to the Regional Planning Commission Meeting.

There being no questions or objections, the Chairman called for a motion to approve the balance sheet. It was so moved by Parish President Robby Miller and seconded by Parish President Kirk Lepine and approved unanimously by the members of the Regional Planning Commission, as noted by the Chairma

Lake Pontchartrain Barrier: Request to U.S. Army Corps of Engineers and

Pontchartrain Basin Restoration Program

5 | Page

Minutes for the TPC & RPC Meeting - September 13, 2022

Mr. Jeff Roesel introduced the resolution to the board and deferred the resolution to Parish President Mike Cooper who thanked the RPC for allowing him to consider this request and explained the resolution to the board and offered this resolution for consideration and asked for a seconded motion that was made by Parish President Matt Jewell, there were no objections, and the resolution was approved by the board. Mr. Lee Giorgio stated that this resolution is well needed, appropriate and long overdue.

For more information on the Lake Pontchartrain Barrier: Request to U.S. Army Corps of Engineers and Pontchartrain Basin Restoration Program, please contact St. Tammany Parish Council Office at 985-898-2590 or councilmembers@stpgov.org

5. Presentation: Brownfield Grant Award- St. Bernard Parish

By: Adam Tatar

Brownfields Coordinator, RPC

Mr. Jeff Roesel introduced Mr. Adam Tatar, RPC Brownfield Coordinator to the members. Mr. Tatar showed the members a presentation slide on the Brownfield Grant Award for St. Bemard Parish and described the program and the results of the coordination efforts. Mr. Jeff Roesel stated that RPC and St. Bernard parish have been working to apply for Brownfield Program funds on behalf of the parish. The parish was recently awarded funds from the EPA to start on that effort.

For a copy of this presentation, please contact Mr. Adam Tatar at atatar@norpc.org or 504-483-8533.

6. Consideration: Travel Request

Mr. Jeff Roesel referred members to page 8 of the meeting packet and pointed out 3 travel requests, the first request was retroactive for Ms. Maggie Woodruff and Ms. Elizabeth Morris, who attended the Louisiana Broadband Summit, August 30-31, 2022, in Alexandria, LA. The second travel request is for Ms. Maggie Woodruff, to attend the NADO Annual Training Conference, October 16-18, 2022, Pittsburgh, PA., and the 3rd request is for Mr. Adam Tatar, to attend the Louisiana Brownfield Conference, October 4-5, 2022, Houma, LA.

There being no questions or objections, the Chairman called for a motion to approve the travel requests. It was so moved by Mr. Ray Lauga, Jr. seconded by Ms. Susan Klees and approved unanimously by the members of the Regional Planning Commission, as noted by the Chairman.

7. Consideration: Contract Extensions

Mr. Jeff Roesel referred the members to page 8 of the packet for the contract extension and explained that the extension is a no cost extension, time only,

There being no questions or objections, the Chairman called for a motion to approve the contract extension. It was so moved by Councilmember T.J. Smith and seconded by Mr. Christopher Abadie and approved unanimously by the members of the Regional Planning Commission, as noted by the Chairman.

8. Consideration: Consultant Billings

Mr. Jeff Roesel referred the members to a summary list of the consultant bills on pages 8 of the meeting packet, noting that staff had reviewed each of them and favorably recommended them for approval.

There being no questions or objections, the Chairman called for a motion to approve the consultant billings. It was so moved by Parish President Robby Miller, seconded by Councilmember Wanda Alcon, and approved unanimously by the members of the Regional Planning Commission, as noted by the Chairman

9. Consideration: **Public Comment Period**

Parish President Cooper wanted to take the opportunity to thank everybody for the unanimously support of the resolution that was offered and for those Parish Presidents who are present to please sign the letters of support. The Chairman asked if there was any other public comment. There was none.

10. Consideration: Other Matters

Mr. Jeff Roesel wanted to remind the members that there will be no Commission Meeting in November because of Election Day.

The Chairman asked if there were any other matters. There was none. There was a motion to adjourn the meeting by Mr. Allen Hero, Parish President Benny Rousselle seconded, and the Chairman adjourned the meeting.

Appendix F: Transit Projects

Note: The "Comment" field in the Transit TIP indicates the state of good repair asset management category to which a project contributes. The abbreviations for categories are as follows:

- RS: Rolling Stock
- EQ: Equipment
- FA: Facilities
- IN: Infrastructure (applies to rail infrastructure only; RTA is the sole operator of rail transit in the region)

Appendix G: Highway Projects

Projects in the TIP are listed alphabetically by parish, then in ascending order by state project number. An example project page and field descriptions are included below.

1.	State Project Number
2.	Project Title
3.	Is/Is Not a Line Item in State TIP
4.	Route Number
5.	State Control Section
6.	Beginning State Log Mile
7.	Ending State Log Mile
8.	Parish in which Project is Located
9.	Non-state Road Name
10.	Additional Comments
11.	Improvement Description
12.	Work Category
13.	FHWA Performance Measure Category
14.	MTP Priority (1 = Safety; 2 = Sustainability & Resilience; 3 = Equity; 4 = Econ. Opportunity; 5 = Reliability; 6 = Preservation)
15.	Project Phase
16.	Project Cost
17.	Project Cost plus 10% Contingency
18.	Federal Share of Phase
19.	Funding Source(s)
20.	Federal Fiscal Year
21.	Project Sponsor
22.	Funding Totals
23.	Project Urbanized Area
24.	Project Parish(es)
