TRANSPORTATION IMPROVEMENT PROGRAM

SOUTHEAST LOUISIANA METROPOLITAN PLANNING AREA

FEDERAL FISCAL YEARS 2027-2030

METROPOLITAN PLANNING ORGANIZATION

FOR THE NEW ORLEANS, MANDEVILLE-COVINGTON, SLIDELL, AND SOUTH TANGIPAHOA URBANIZED AREAS

HOSTED AT

THE REGIONAL PLANNING COMMISSION FOR JEFFERSON, ORLEANS, PLAQUEMINES, ST. BERNARD, ST. CHARLES, ST. JOHN THE BAPTIST, ST. TAMMANY, AND TANGIPAHOA PARISHES

10 VETERANS BLVD., NEW ORLEANS, LA 70124 www.norpc.org

U.S. DOT Funding: The preparation of this document was financed in part through grants from the U.S. Department of Transportation, Federal Highway Administration, under the Metropolitan Planning Program, Section 104(f) of Title 23, U.S. Code. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation

Data Disclaimer: The data herein, including but not limited to geographic data, tabular data, analytical data, electronic data structures or files, are provided "as is" without warranty of any kind, either expressed or implied, or statutory, including, but not limited to, the implied warranties or merchantability and fitness for a particular purpose. The entire risk as to the quality and performance of the data is assumed by the user. No guarantee of accuracy is granted, nor is any responsibility for reliance thereon assumed. In no event shall the Regional Planning Commission for Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany, and Tangipahoa Parishes (RPC) be liable for direct, indirect, incidental, consequential, or special damages of any kind, including, but not limited to, loss of anticipated profits or benefits arising out of use of or reliance on the data. The RPC does not accept liability for any damages or misrepresentation caused by inaccuracies in the data or as a result of changes to the data caused by system transfers or other transformations or conversions, nor is there responsibility assumed to maintain the data in any manner or form. These data have been developed from the best available sources. Although efforts have been made to ensure that the data are accurate and reliable, errors and variable conditions originating from physical sources used to develop the data may be reflected in the data supplied. Users must be aware of these conditions and bear responsibility for the appropriate use of the information with respect to possible errors, scale, resolution, rectification, positional accuracy, development methodology, time period, environmental and climatic conditions and other circumstances specific to these data. The user is responsible for understanding the accuracy limitations of the data provided herein. The burden for determining fitness for use lies entirely with the user. The user should refer to the accompanying metadata notes for a description of the data and data development procedures. Although these data have been processed successfully on computers at the RPC, no guarantee, expressed or implied, is made by RPC regarding the use of these data on any other system, nor does the act of distribution constitute or imply any such warranty. Distribution of these data is intended for information purposes and should not be considered authoritative for navigational, engineering, legal and other site-specific uses. Data was prepared by Geographic Information System (GIS) professionals, not by licensed professional land surveyors or engineers. GIS data may have been generated using specific Artificial Intelligence (AI) or machine learning tools in GIS software. Users must independently review, validate, and fact-check all results before relying on them for decision-making, planning, or operational use.

Title VI Notice: The Regional Planning Commission (RPC) fully complies with Title VI of the Civil Rights Act of 1964 and related statutes, executive orders, and regulations in all programs and activities. RPC operates without regard to race, color, national origin, income, gender, age, and disability. Any person who believes him/herself or any specific class of persons, to be subject to discrimination prohibited by Title VI may by him/herself or by representative file a written complaint with the Louisiana Department of Transportation (LADOTD). LADOTD Title VI Program Manager may be reached via phone at 225-379-1361. A Complaint must be filed no later than 180 days after the date of the alleged discrimination. RPC meetings are conducted in accessible locations and materials can be provided in accessible formats and in languages other than English. If you would like accessibility or language accommodations, please contact the Title VI Coordinator at RPC at 504-483-8513 or mgivhan@norpc.org. If you wish to attend a RPC function and require special accommodations, please give RPC one week's notice in advance.

Introduction

The Transportation Improvement Program (TIP) is adopted every four years by the Regional Planning Commission (RPC). This document is prepared cooperatively by the RPC, acting in its legal capacity pursuant to 23 CFR 450 as the Metropolitan Planning Organization (MPO) for the New Orleans, Mandeville-Covington, Slidell, and South Tangipahoa Urbanized Areas (UZAs), and the Louisiana Department of Transportation and Development (LADOTD) and affected transit operators. The TIP consists of a priority list of capital and non-capital surface transportation projects (or phases of projects) that are being advanced toward construction over the four-year period from Federal Fiscal Year (FFY) 2027 to FFY 2030. The document also includes a limited number of projects anticipated to be implemented in FFY 2031 because planning and development for those projects is already underway. Projects found in the TIP have evolved through the transportation planning process and are contained in the region's long-range Metropolitan Transportation Plan (MTP), and the TIP is updated at least every four years. The RPC reviews the TIP annually and selected revisions are permitted, following formal amendment procedures. The TIP may be viewed on RPC's website at www.norpc.org.

The State TIP (STIP) contains an identical set of projects proposed for federal funding. The TIP and STIP are products of a consensus building process carried out jointly by the RPC and LADOTD, and both are on the same four-year update cycle.

Candidate projects for MTP and TIP consideration come from various sources, including RPC's public outreach initiative, input from business, civic, and community organizations, state and local governmental entities, and other transportation stakeholders. Projects are first screened by RPC for technical merit and consistency with the region's adopted transportation goals and the ten planning factors which guide the implementation of the nation's transportation bill, the Infrastructure Investment and Jobs Act of 2021 (IIJA, also known as the Bipartisan Infrastructure Law (BIL)). Following the initial project screening process, potential projects are accepted into the MTP for further evaluation and refinement. During the planning phase, projects undergo a series of rigorous technical analyses to determine overall feasibility, environmental consequences, project costs, and potential funding sources before being advanced into final design, project letting, and construction implementation.

The Southeast Louisiana Metropolitan Planning Area

The Metropolitan Planning Area (MPA) is comprised of a historically significant central city surrounded by smaller municipalities and contemporary suburban areas. The MPA encompasses the New Orleans, Mandeville-Covington, South Tangipahoa, and Slidell urbanized areas (UZAs) as well as the portion of the region that is expected to become urbanized in the next 20 years and which the RPC must consider in its transportation planning process (Figure 1). The borders encompass nine parishes: Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. James, St. John the Baptist, St. Tammany, and Tangipahoa. The MPA also includes a small portion of Livingston Parish. Table 1 lists the estimated population in 2023 of each UZA in the region and the MPA as a whole.

Table 1: UZA and MPA 2023 Estimated Populations

Area	2023 Estimated Population[1]
New Orleans UZA	947,803
Mandeville-Covington UZA	115,380
Slidell UZA	96,288
South Tangipahoa UZA	76,689
Total MPA	**1,405,577**

As an MPO, the RPC is responsible for regional transportation planning and federally-funded project programing for the region's transportation system. Additionally, UZAs with populations over 200,000, such as the New Orleans UZA, are designated as a Transportation Management Area (TMA). MPOs serving a TMA have a stronger influence over the priorities and projects listed in the TIP. They are also responsible for additional planning products, and their planning processes must be certified by the Secretary of the

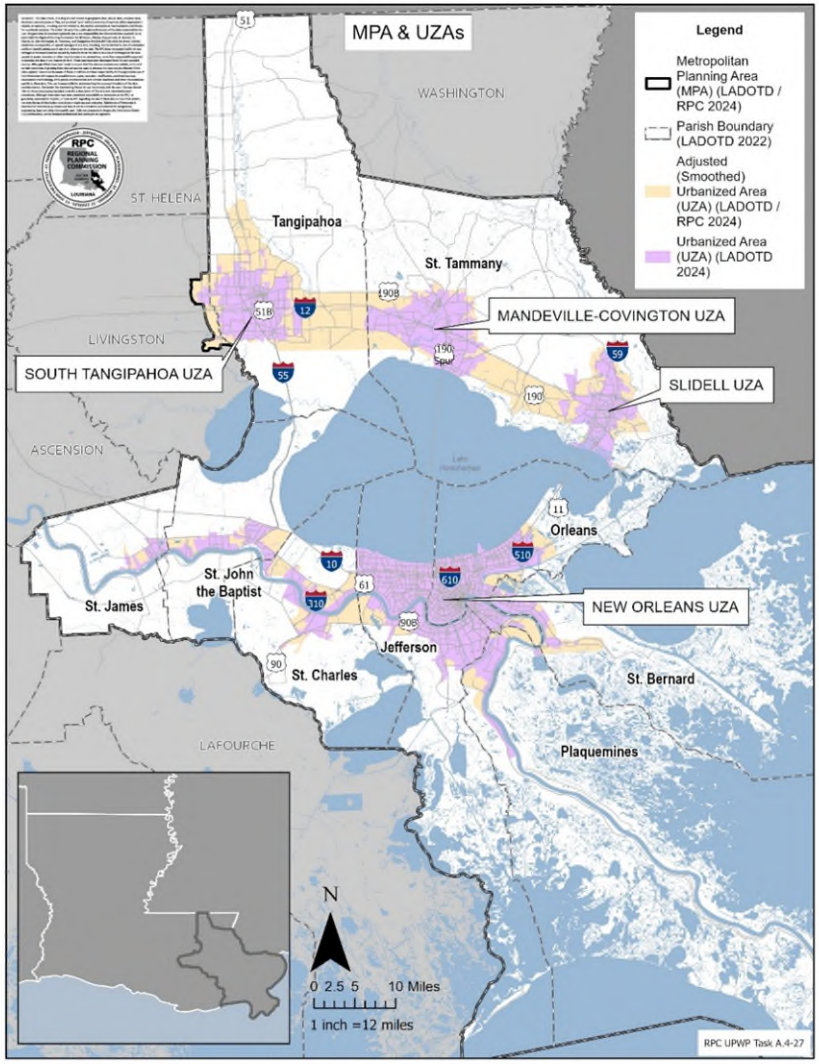

Figure 1: New Orleans MPA and its UZAs

[1] American Community Survey (ACS) 5-Year Estimates (2019-2023) published December 2024.

Department of Transportation (DOT) as complying with federal requirements. It should also be noted that MPOs serving designated nonattainment or maintenance areas for ozone or carbon monoxide under the Clean Air Act (42 USC 7401) are required to follow additional federal regulations; however, the MPA served by the RPC does not contain any such nonattainment or maintenance areas.

TIP Development

The projects contained in the TIP are derived from the region's overall 30-year MTP. Both the TIP and MTP have been fiscally constrained (based on past funding history) to reflect realistic and available levels of project funding. Projects shown in the TIP for advancement were fully discussed with the RPC Transportation Policy Committee (TPC), LADOTD, and local transit providers prior to placement in the TIP. Only projects which were mutually agreed upon by these stakeholders as to overall merit and funding availability were selected for TIP and STIP inclusion. Per 23 450.326(f), the TIP is required to include all regionally significant projects requiring action by FHWA or FTA, regionally significant projects to be funded through non-FHWA or -FTA federal sources, or regionally significant projects to be financed through non-federal sources. All such projects are listed in Appendices E through I. As of the writing of this plan there are no non-federally funded, regionally significant projects that meet the requirements outlined in 23 CFR 450.326(f).

The TIP also contains a list of all highway and transit projects obligated for implementation as part of the previous TIP (FFY 23 through FFY 26). Since its adoption in 2023, the RPC, in coordination with its state and federal partners, has made steady progress towards implementation of the projects programmed in the previous TIP. While minor project delays do occur, often as a result of extended administrative processes at various stages of project development, delays to major projects have not been significant.

Planning Process

Moving from planning to project implementation requires evaluating the feasibility of potential system improvements, and a means by which to prioritize projects. Though the process of identifying, developing, and implementing projects is complex, it can be summarized in the following steps:

1. **Identify Opportunities for Improvement:** Most projects begin with the identification of an opportunity to change the transportation system in a way that will better serve the region. For example, there may be a problem that needs to be solved such as congestion at a major intersection, or there may be an unmet need that can be addressed, such as increasing non-motorized access to a neighborhood. Such opportunities are identified through a wide variety of sources, input from elected officials, RPC's planning programs, and LADOTD and transit operator input. Public engagement plays a particularly important role in this process. The RPC continually seeks input from the public on general trends and needs as well as specific projects, and uses this information to guide its overall planning process and project prioritization. RPC's process for gathering and using input from the public is described in detail in its Public Participation Plan (PPP), available at www.norpc.org, and an excerpt of the PPP including the sections relevant to the TIP can be found in Appendix B.
2. **Study Potential Options:** Once an opportunity for change has been identified the RPC studies how it can be accomplished through modifications to the transportation system. For example, if there is a need to reduce crashes at a particular location, can that be done through infrastructure improvements, operational changes, or other alterations? The timeline and level of effort required for such studies depend on the complexity of the issue and its potential impacts on the community. In all cases, studies rely on the participation and input of relevant stakeholders such as LADOTD, transit operators, and local governments, as appropriate.

3. **Define Projects:** The previous two steps result in recommendations for real-world projects that will improve the transportation system. Once a potential project has been defined, further refinements are completed as necessary. It should be noted that there is no single list of potential projects developed at one point in time from which the RPC chooses projects to be included in the MTP or TIP. Rather, projects are developed on an ongoing basis using a continuing, comprehensive, and cooperative ("3C") process which acknowledges that individual projects and their sponsors require differing timelines and development tasks to reach implementation readiness.
4. **Fund and Prioritize Projects**: After a project has been defined, the RPC determines how it may be funded and how its implementation will be prioritized among the many other projects within the RPC's program. Project prioritization depends on multiple interrelated factors, including stakeholder support, potential impact and need, and funding availability.

RPC Programs

The steps described above are accomplished through the ongoing implementation of multiple RPC processes and programs. While these efforts are described separately below, the RPC recognizes that the region's transportation network is an integrated system, and accordingly conducts holistic planning efforts that utilize best available practices, methods, and technologies.

- **Public Transit & Human Services:** The New Orleans MPA accounts for by far the largest share of transit ridership in the state of Louisiana, and the RPC places a priority on enhancing the quality of public transit service in the region. The RPC provides planning and technical support to fixed-route transit operators as they have prioritized increasing regional transit integration, modernizing fleets, and redesigning the regional bus and streetcar network to improve service frequency and access to destinations. RPC's Coordinated Public Transit-Human Services Program is complementary to its transit planning program, and focuses on serving the needs of low-income, elderly, and disabled populations in the region. It is guided by the Coordinated Public Transit-Human Services Plan, most recently updated in 2020, which outlines regional needs and presents a series of goals, objectives and strategies for serving vulnerable populations.

- **Walking and Biking:** Facilitating safe walking and biking is integral to RPC's planning process, and the potential for adding or enhancing non-motorized facilities is considered during the development of all projects. In addition to considering the needs of people walking and biking at the project level the RPC also continues to engage in larger-scale programs intended to increase the use of non-motorized modes across the region. The agency works to accomplish this with data-driven analysis and decision-making; planning and design for comprehensive land use and sustainable transportation; and a range of educational and outreach tools.

- **Roads, Highways, and Bridges:** Maintaining and improving the region's roads and highways has been a central concern of the RPC since its creation. Ensuring that drivers can expect reliable travel times on roads and bridges that are in a state of

good repair will continue to be a primary focus for the transportation planning process.

- **Congestion Management:** Much of the RPC's work regarding travel reliability for motor vehicles centers on the Congestion Management Process (CMP), an ongoing series of activities that identifies traffic congestion throughout the region, defines needs related to congestion reduction, and recommends congestion mitigation strategies. The Process was updated in 2026 and includes a System Performance Report that describes overall congestion on the many of the region's most significant corridors. The strategies identified in the CMP are summarized below, and the Screening and Prioritization of Projects section of the TIP further describes how individual projects are related to the CMP.
  - *Transportation Systems Management and Operations (TSMO)* strategies can enhance the efficiency of the transportation system through improved operations and management, often without major infrastructure investments. TSMO strategies can include Access Management, Operations Management, Incident Management, and Intelligent Transportation Systems.
  - *Travel Demand Management (TDM)* strategies take many forms, but all have the general goal of reducing the need to travel by Single Occupant Vehicle (SOV). TDM strategies can include: High Occupancy Vehicle (HOV) usage; alternative work arrangements such as work from home or non-traditional hours; parking supply and pricing management; and alternative transportation modes such as public transit, walking, biking, and rideshare.
  - *Roadway capacity increases* physically expand the roadway to create space for more vehicles. While they are often seen as a primary tool for reducing congestion, they can be less effective and more costly than other strategies. As such the CMP encourages the consideration of other strategies before increasing capacity. However, capacity increases are sometimes appropriate and necessary, and the RPC carefully considers where and how they should be implemented.

- **State of Good Repair:** The RPC evaluates the need for roadway maintenance and repair through two primary mechanisms: quantitative performance measures and stakeholder input. Road and bridge conditions are two of the federally-required performance measures tracked by the RPC, further discussed in the Performance Based Planning and Programming section below. The measures provide both an overview of regional conditions as well as conditions on specific roadways. The RPC receives further detail about which roadways should be prioritized for repair from local and state partners, who are encouraged to utilize the RPC's resources to maintain the system in a state of good repair.

- **Freight:** MPOs are not required to develop a regional Freight Mobility Plan; however, the centrality of freight to the region's economy and the significance of the region to national freight networks point to the need for a deliberative freight planning process. The regional Freight Mobility Plan guides the RPC Freight Program and informs the overall planning process. In addition to broad policy goals, the Freight Mobility Plan describes processes for project evaluation and implementation as well as recommendations for projects and studies that will improve freight movement throughout the region.

- **Safety:** The RPC continues to integrate safety within all projects and programming to reduce fatalities and serious injuries. Safety goals for the RPC are closely linked to Louisiana's Strategic Highway Safety Plan (SHSP), a data-driven approach led in part by LADOTD. In addition, the U.S. DOT has formally committed to the long-term goal of reducing road fatalities to zero, the only acceptable number. This commitment is part of a new strategy to implement the National Roadway Safety Strategy (NRSS), which outlines the USDOT's comprehensive approach to significantly reduce deaths and serious injuries to zero on our nation's roadways. The NRSS adopted the Safe System approach, which was founded on the principles that humans make mistakes and that human bodies have limited ability to tolerate crash impacts. The RPC is committed to this approach and addressing traffic safety as a public health issue. Each project introduces opportunities to evaluate crash histories and unsafe conditions, and to identify modifications that will reduce injuries and fatalities.

- **Transportation Resilience:** As the need to protect the community against hazardous events becomes increasingly apparent the RPC has begun building a transportation resilience planning program. As the RPC seeks to enhance the resilience of the system itself it will also need to carefully consider how those improvements can most effectively benefit the community. The RPC's Transportation Risk and Infrastructure Protection Plan (TRIP) provides a systematic approach to addressing transportation vulnerabilities and identify potential courses of action for improving regional resilience. Many of the projects listed in the TRIP are also included in the TIP and MTP, and the RPC will continue to work with state and local partners to advance other resilience projects through the planning process.

Each of the programs described above directly contributes to development of the TIP. They direct RPC staff to identify opportunities for improvement, define specific concerns to be studied, and recommend strategies to be incorporated into projects to address program-related needs. They also offer insight into how projects should be prioritized by providing RPC staff with data and clearly defined objectives against which projects can be evaluated.

Financial Plan

Both the TIP and MTP have been fiscally constrained to reflect realistic and available levels of project funding. The TIP only includes projects for which construction or operating funds are reasonably expected to be available. Projected future funding levels are based on past funding trends as well as ongoing coordination with LADOTD, transit operators, and local partners. The federal funding available to the Southeast Louisiana MPA and transit operators is determined by formula outlined in federal legislation, and specific amounts available are communicated to the RPC by LADOTD on a regular basis, at least once per fiscal year. Further, RPC and LADOTD conduct project reviews (termed "whiteboard meetings") to periodically review the program and make adjustments based on implementation progress. This ongoing process allows the RPC to develop an average estimated amount of both federal and non-federal financial resources that can be used as a benchmark in the prioritization process. In compliance with 23 CFR 450.326(m) the TIP does not distribute suballocated Surface Transportation Program (STP) funds to individual jurisdictions or modes within the MPA by pre-determined formula.

Over time the region has experienced an overall increase in construction spending due to improved coordination of the planning and programming efforts of RPC and LADOTD. Fiscal constraint has resulted in a goals-oriented approach emphasizing traffic safety, transit reliability, and roadway system preservation.

The FFY 2027-2030 TIP does not include funding sources that were not also available for the previous TIP (FFY 2023-2026), nor does it propose the use of new or unidentified funding sources or financing strategies. If new funding sources are identified or created through local, state, or federal action after the TIP has been adopted, the RPC will consult with local partners, LADOTD, and federal agencies to determine appropriate action for incorporating them into the TIP. It is anticipated that if new funding sources are identified the overall process for determining available funding levels and ensuring fiscal constraint will remain similar to current practice.

Highway Funding

Surface Transportation Block Grants (STBG) are the primary form of federal funding made available to the New Orleans MPA for highway projects through the Surface Transportation Program (STP). The STP funds programmed by the RPC are further delineated as those made available for the New Orleans UZA, which has a population over 200,000 (STP>200K), and for the Mandeville-Covington, Slidell, and South Tangipahoa UZAs, which have populations between 50,000 and 200,000 (STP 50-200K). Under IIJA, these funds can be used for a variety of projects, including roadway maintenance, bicycle and pedestrian facilities, bridge and tunnel rehabilitation, lighting, resilience enhancements, and planning. In most cases, use of the funds is limited to a subset of regional roadways, known as the Federal Aid Network, which have been determined to be significant to regional travel. STBG funds can also be “flexed” to public transportation, making them eligible for all the projects described in the next section.

The MPO also receives an annual apportionment of Carbon Reduction Program (CRP) funds. These funds may be used for a variety of multi-modal projects that are specifically intended to reduce carbon dioxide emissions. As with STP funds, they are categorized based on the population of the UZA in which they will be utilized (50-200K or >200K).

MPO attributable (STP & CRP) projects listed in the TIP are fiscally constrained, reflecting the annual attributable amount plus a 20% non-federal match. The non-federal match is provided by a project sponsor, typically the owner of the transportation facility on which the project will be implemented. The most frequent project sponsors are LADOTD and local government agencies. In the case of local agencies, the availability of matching funds is ensured through the contractual agreement the entity enters into with the state when it agrees to accept federal funds.

The region has a positive balance of attributable funds that may be utilized on occasion to cover an increase in project costs due to environmental, construction, or right-of-way needs. For the purposes of fiscal constraint, the TIP assumes that STP and CRP formula funding will increase 2% each year. Project construction costs are initially listed in 2026 dollars. To account for potential additional project costs, including inflation and Construction Engineering and Inspection (CE&I), a 15% contingency is added to all construction

phase costs. This added contingency sufficiently reflects year-of-expenditures costs. Available attributable funds compared to project costs programmed in the TIP are summarized in Table 2 below. Appendix I includes the list of highway projects programmed in the TIP that will utilize STP and CRP funds with totals of MPO attributable funds available and programmed for each fiscal year.

Table 2: STP & CRP Apportionment and Programmed TIP Funds

	FFY 2027	FFY 2028	FFY 2029	FFY 2030	Total TIP FFY 27-30
Total Carried Forward from Previous FFY	$71,402,296	$53,657,386	$35,365,985	$31,586,754	
Total Apportionment	$42,301,483	$43,147,513	$44,010,463	$44,890,673	$174,350,132
Total Available	$113,703,780	$96,804,899	$79,376,448	$76,477,426	$245,752,428
Total Federal Share Programmed In TIP	$60,046,394	$61,438,914	$47,789,694	$15,499,254	$184,774,256
Total Unobligated Balance	$53,657,386	$35,365,985	$31,586,754	$60,978,172	$60,978,172

In addition to MPO attributable funds, there are a variety of federal transportation programs that the state may use to fund transportation projects in the region. For example, the National Highway Performance Program (NHPP) provides support for the condition and performance of the National Highway System, Highway Safety Improvement Program (HSIP) funds are dedicated for projects intended to reduce fatalities and serious injuries on all public roads, and the IIJA introduced the Bridge Formula Program, which can be used to replace or rehabilitate bridges in poor condition. Though funding through these programs is apportioned to the state, their use in the MPA must still be approved by the MPO policy board and the projects they fund must be included in the TIP. As stated in 23 CFR 450.326(e):

> The TIP shall include capital and non-capital surface transportation projects (or phases of projects) within the boundaries of the metropolitan transportation area proposed for funding under 23 U.S.C. and 49 U.S.C. Chapter 53 (including transportation alternatives, associated transit improvements; Tribal Transportation Program, Federal Lands Transportation Program, and Federal Lands Access Program projects; HSIP projects; trails projects; accessible pedestrian walkways; and bicycle facilities…

Appendix J includes all projects to be financed through MPO-attributable federal funds as well as regionally significant projects to be financed through state attributable funds. Additional projects using state attributable federal funds may be included in the aggregated DOTD budget line item categories listed in Appendix F. As RPC is made aware of individual projects funded through these mechanisms it will coordinate with DOTD and local agencies to ensure they support regional goals and performance measures.

Local governments and other agencies that own and operate transportation infrastructure also use their own funds to maintain and improve the transportation system, including the Federal Aid Network. Revenue sources for such projects vary between jurisdictions.

Funding is often generated through local taxes and fees, though each jurisdiction finances transportation projects through a unique combination of revenue streams. Similarly, local agencies use differing mechanisms to establish and track costs based on budgetary needs and administrative resources. In many cases, local agencies do not track whether their funds are being spent on or off the Federal Aid network, as this designation is primarily used to establish eligibility for the use of federal funding and unrelated to projects that are solely locally funded. The variety of accounting systems and budgeting processes among the MPA's parishes, municipalities, and other local agencies creates a complex funding mix that is difficult to track over time and at the regional level. To better understand the landscape of transportation revenues and funding across the region the RPC will strive to collect and track local budgetary data where possible. As information becomes available it will be added to this financial plan and in subsequent iterations of the TIP.

Finally, some funding sources are non-recurring, discretionary grants that fund large, complex projects that serve multiple modes of travel and have regional or national significance, such as Rebuilding American Infrastructure Sustainably and Equitably (RAISE). Other discretionary programs, such as the Reconnecting Communities Pilot Program and Safe Streets and Roads for All, focus specifically on removing community barriers and improving safety and mobility for bicyclists and walkers. The RPC will monitor such programs to determine their applicability to local priorities and assist local governments in discovering and applying for these opportunities.

Transit Funding

Most of the Federal funding for public transportation in the region is through guaranteed annual federal grants. To determine the amount apportioned to an urbanized area, these grants consider variables such as the population and population density, the size of the transit network, and the miles traveled by transit vehicles each year. Formula funding can be used by the region's transit agencies for many activities that are necessary to maintain and run their system. These investments can generally be divided into six categories: operating expenses, revenue vehicles, facilities, streetcar infrastructure, non-revenue vehicles, and miscellaneous expenses.

The majority of project funding is based on Section 5307 formula funds which are listed annually in the *Federal Register.* In the previous TIP (FFY23-26) Section 5307 funding averaged about $23 million annually for the New Orleans UZA, $3.6 million for the St. Tammany UZAs, and $1.3 in the South Tangipahoa UZA.

Similar to highway projects, the transit projects described in the FFY 27-30 TIP are fiscally constrained. Projects are not included if funding cannot reasonable expected. For the purposes of fiscal constraint, the TIP assumes that Section 5307 transit formula funding will increase 2% each year. While it's impossible to predict how the federal transportation program might change in the future, this is a rate that is consistent with historical trends. Using this assumption, and using 2026 formula funding as a base, the projected Section 5307 funding for FFY 27-30 is shown in Table 3.

Table 3: Projected Section 5307 Funding, FFY 27-30

	FFY 2027	FFY 2028	FFY 2029	FFY 2030
New Orleans UZA	$ 22,957,754.00	$ 23,416,909.00	$ 23,885,247.00	$ 24,362,952.00
St. Tammany UZAs (Combined)	$ 4,001,222.00	$ 4,081,247.00	$ 4,162,872.00	$ 4,246,129.00
South Tangipahoa UZA	$ 1,296,892.00	$ 1,322,830.00	$ 1,349,286.00	$ 1,376,272.00

Additional support may also come from Section 5339 funds for bus and bus facility replacement or rehabilitation, and Section 5337 for fixed guideway (streetcar and dedicated bus lane) improvements. These funds are programmed based on current or pending Congressional authorizations. Matching funds for transit projects come from dedicated local revenue sources, such as a 1% sales tax and a percentage of the Hotel/Motel Tax in Orleans Parish, and a property tax millage in Jefferson Parish.

As with projections of highway funding, the TIP cannot reliably account for discretionary grant opportunities which transit agencies may seek to fund large capital projects. The RPC regularly coordinates with its partner transit agencies to monitor and access discretionary funding opportunities, and if they are awarded fiscal constraint will be assured using similar processes as existing fund sources.

Distribution of Document for Public Review

RPC solicited public comment on the TIP in compliance with its PPP. The specific requirements of that process are described in Appendix B. The draft TIP was posted online at www.norpc.org for citizen review, input and comment, and printed copies were available for review by request at the RPC's physical location. The public was also afforded the opportunity to express their comments directly to the TPC at a meeting prior to official action on the TIP document. RPC provided a 30-day public comment period for review of the draft FFY 27-30 TIP, from September 8, 2026 to October 12, 2026. During this time the document was available for review and comment on the RPC website, at public libraries throughout the region, and by request. This availability was announced on the website as well as in *The Times Picayune* | *The New Orleans Advocate*.

During the regular TPC meeting on October 13, 2026, time was made for additional public comment on the TIP. Notice of the meeting was given through the methods described above, as well as through the standard notice which is placed in the newspaper one week prior to every RPC Board meeting. This meeting takes place at the Regional Transportation Management Center, a facility that is ADA accessible and is close to bus stops on both the New Orleans Regional Transit Authority's 45 (Lakeview) route and the Jefferson Transit's E1 (Veterans Blvd) route. Comments received during the public comment period are listed in Appendix C along with RPC's responses.

TIP Amendment Process

The TIP may require occasional revisions as projects advance through the development process. In such instances the RPC will follow procedures permitted by 23 CFR 450.328 and further outlined in LADOTD and RPC policy. Minor project changes, as defined by LADOTD policy, may be accomplished through an Administrative Modification approved by the RPC's Executive Director. More significant changes require a TIP amendment, and these must be approval by the TPC, including public notice and comment opportunities as described in the PPP. Amendments or modifications to the TIP will be noted in the document as appropriate.

Screening and Prioritization of Projects

Once potential projects have been identified they are screened and prioritized based on three primary criteria: project readiness and stakeholder input; support of the regional priorities established in the MTP; and contribution to the achievement of specified performance measure targets. These criteria are interrelated and their impacts on project selection and prioritization vary from project to project.

The process for determining a project's readiness, its support of the MTP, and its contribution to achieving targets is summarized below. The RPC's overall process for selecting and prioritizing projects has remained relatively stable since the previous TIP, though specific programmatic recommendations have evolved over time. These updates, and the planning process in general, are more thoroughly described in the MTP. Additional information about how individual RPC programs impact project development and selection can be found in the CMP, the Regional Freight Mobility Plan, the Unified Planning Work Program (UPWP), and other planning documents available on the RPC's website (www.norpc.org).

Project Readiness

The RPC works very closely with LADOTD staff, parish and municipal stakeholders to establish realistic project priorities, based on where the project actually rests in the implementation pipeline. Meetings are held at least quarterly with LADOTD and local governments to monitor the actual status of TIP projects and scheduled letting dates. This periodic review helps the region to establish firm project priorities rather than "paper" priorities. The review considers important factors such as the status of environmental clearances, survey work, preliminary plans, right-of-way, utilities, advance check prints and final plan preparation. When taken together, these criteria establish the relevant let date and, therefore, the priority order for implementation of TIP projects. The cost of the project, type of funding, and the availability of proposed funding are also considered in priority setting. The above project level information is made available to the Technical Advisory Group, or the general public upon request, and project work status is utilized extensively in establishing the priority program. The draft TIP is also presented to the TPC for review and input, along with any citizens' comments received, prior to finalization of priorities.

Relationship to MTP

Projects in the MTP are selected through a consultative process with the state, local transit operators, and the TPC. This process is further informed by the various RPC programs described in the previous section. Following inclusion in the MTP, projects are advanced into the TIP based on their need or merit and the ability of the state and region to finance the improvement. As such, projects contained in the TIP are a result of the region's transportation planning process and are supportive of the planning Goals identified in the MTP: Safety; Sustainability & Resilience; Community Impact; Economic Development; Reliability & Connectivity; and System Preservation & Stewardship.

The Goals described in the MTP reflect a vision for the regional transportation system that considers historic trends, projections of future needs, multimodal trade-offs, stakeholder expertise, and public input. Prior to inclusion in the MTP or TIP each project is evaluated by RPC staff to determine its relationship to the regional Goals. The evaluation is standardized for all project and considers dozens of criteria, each of which helps to determine the extent to which a project relates to the Goals. All projects must contribute to at least one MTP Goal to be included in the MTP or TIP, and most projects contribute to more than one Goal. By ensuring each project in the TIP is supportive of the MTP's Goals, the RPC directly links the MTP's recommendations to real-world projects. In this manner the TIP is a primary mechanism for implementing the MTP.

The percentage of TIP projects contributing to each Goal is described in Figure 2 and each project page in the TIP indicates the MTP Goals to which that project is related.

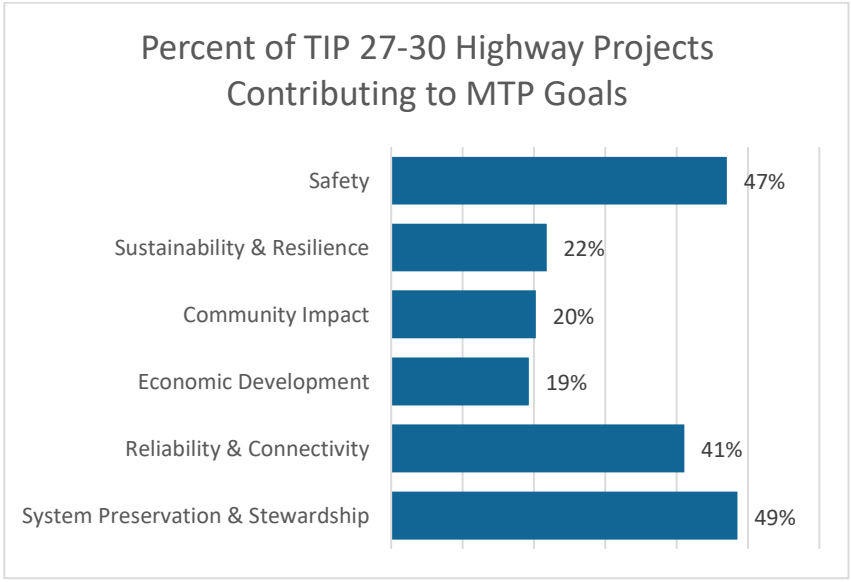

Figure 2: TIP Projects and MTP Goals

By implementing a program of projects that have each been determined to contribute to the MTP Priorities it can be expected that over the next four Federal Fiscal Years the region will incrementally advance progress towards addressing the Priorities. Individual project descriptions in the TIP note the MTP Goals to which that project contributes. This information can also be used to determine which RPC programs relate to each project. For instance, projects that contribute to the Reliability and Connectivity Goal incorporate congestion mitigation strategies identified in the CMP.

Performance Based Planning and Programming

Performance Based Planning and Programming (PBPP) is an approach adopted by the Federal Highway Administration (FHWA), Federal Transit Administration (FTA), state DOTs, transit agencies, and MPOs to use quantitative data and other information to strategically direct transportation decision-making. PBPP is a systematic, evidence-based approach to integrating data into the transportation planning process at all levels, from concept to design and implementation. It is important to note that PBPP is not intended to supplant the decision-making roles and responsibilities of the general public, elected officials, or technical experts.

The use of PBPP by MPOs is formally codified by the IIJA (23 CFR Part 490), which requires MPOs and State DOTs identify quantitative targets for several performance measures within four key policy areas: safety; infrastructure condition; system performance and freight movement; and Congestion Mitigation Air Quality (CMAQ). The specific performance measures and their applicability to the RPC are listed in Table 4. All performance measures consider the entire MPA; however, the infrastructure condition, system performance, and freight measures only evaluate performance on the Interstate and non-Interstate National Highway System (NHS).

Table 4: Federally Required Performance Measures

Safety	
Number of fatalities	
Fatalities per million Vehicle Miles Traveled (VMT)	
Number of serious injuries	
Serious injuries per million VMT	
Number of non-motorized fatalities and non-motorized serious injuries	
Pavement & Bridge Condition	
Pavement	Percentage of Interstate pavement in good condition
	Percentage of Interstate pavement in poor condition
	Percentage of non-Interstate NHS in good condition
	Percentage of non-Interstate NHS in poor condition
Bridge	Percentage of NHS bridges in good condition
	Percentage of NHS bridges in poor condition
System Performance & Freight Movement	
System Performance	Interstate Travel Time Reliability (TTRM): percentage of person-miles traveled on the interstate that are reliable

	Non-Interstate TTRM: percentage of person-miles traveled on the non-Interstate NHS that are reliable
Freight Movement	Truck Travel Time Reliability (TTTR) Index: percentage of truck miles traveled on the interstate that are reliable
CMAQ*	
Traffic Congestion	Peak Hour Excessive Delay
	Non-single Occupancy Vehicle Travel
On-road Mobile Source Emissions	Total Emissions Reductions
Transit Asset Management	
Rolling Stock	Percentage of Inventory Exceeding Useful Life
Equipment	Percentage of Inventory Exceeding Useful Life Benchmark
Facilities	Percentage of Inventory exceed 2.5 on TERM scale
Infrastructure	Performance of Track Segment with Performance Restrictions

* Federal regulations require that CMAQ performance measure targets shall be set by MPOs that contain area(s) designated as nonattainment or maintenance for ozone (O3), carbon monoxide (CO) or particulate matter (PM10 and PM2.5) National Ambient Air Quality Standards (NAAQS). There are currently no areas served by the RPC that meet any of these criteria.

For Safety, Pavement and Bridge Condition, System Performance and Freight Movement, and CMAQ, LADOTD is required to establish statewide targets for each measure; the RPC may choose to develop its own targets or adopt those of the state. For Transit Asset Management measures, the region's transit providers establish their own targets and the RPC, in coordination with the providers, develops regional targets. Implementation of the performance measure requirements began in 2018 and the initial round of targets were detailed in the previous MTP, adopted in January 2019. Safety performance targets are required to be updated annually, and the RPC has done so via MTP amendment each year since 2019. All other performance measures are updated every four years, which means the next round of targets will be included as an amendment to the MTP in early 2027. Additionally, the RPC publishes an annual report each year describing interim progress towards target achievement. The current targets for all measures are listed in the MTP and updated targets will be available via plan amendment when they are established.

Relationship of TIP to Performance Measures and Targets

The RPC aims to achieve the targets described above through implementation of the projects listed in the TIP. As described previously each project is selected through careful analysis of its anticipated impacts to the safety, efficiency, effectiveness, and preservation of the regional transportation system. Each project listed in the TIP therefore contributes to the achievement of one or more targets, and

each has been categorized to identify its relationship to the performance measure policy areas: Motorized Safety; Non-motorized Safety; Road Condition; Bridge Condition; Travel Time Reliability; and Truck Travel Time Reliability. Similar to the review of MTP Priorities, each project is evaluated by RPC staff to determine its contribution to achieving the PBPP targets using a standardized set of evaluation criteria.

It is anticipated that each project in the TIP will incrementally impact the performance measures to which it is related. It is important to note that some projects contribute to more than one category. For example, projects that contribute to improved travel time reliability may also improve freight movement. The percentage of highway projects contributing to each performance measure category is shown below, and each project page in the TIP indicates the Performance Measure Category to which that project contributes. Taken together, this information illustrates how the entire program of projects in the TIP will achieve the established targets.

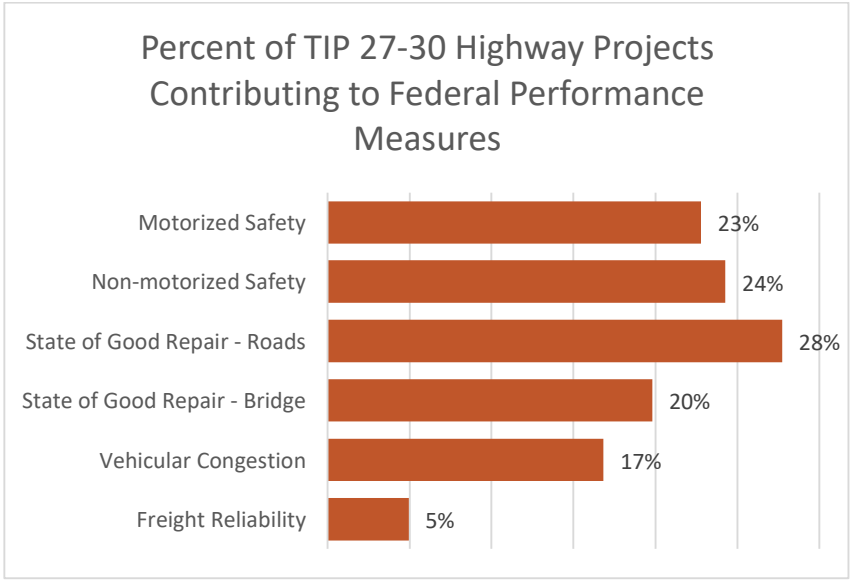

Figure 3: TIP Projects and Performance Measures

Individual project descriptions in the TIP note the Performance Measure Categories to which that project contributes. As with MTP Priorities, this information can be used to determine which RPC programs relate to each project. For instance, projects that contribute to the System Performance and/or Freight Movement targets incorporate congestion mitigation strategies identified in the CMP.

It should be noted that there are approximately 1,311 miles of NHS roadways in the MPA, and of these approximately 103 miles (8%) are locally-owned.[2] The specific locally-owned NHS roadways and their lengths are identified in Appendix D. Projects in the TIP each describe the performance measure targets to which they contribute, and projects on locally-owned NHS routes can be expected to have similar impacts on target achievement as projects on state-owned NHS routes.

It can similarly be demonstrated how much of RPC's annual FTA urbanized apportionment, and what percentage of total transit funding, is dedicated to state of good repair (SGR) by asset category. These relationships are noted in the far right column of the Transit TIP, noting whether a project will contribute toward each asset target (RS: Rolling Stock; EQ: Equipment; FA: Facilities; IN: Infrastructure). Below are summaries of expenditures by SGR asset category for the FY 23-26 TIP. NOTE: These figures are subject to change.

Table 5: TIP Transit Projects' Contributions to Performance Measure Categories

Asset Category	Cost	% of Expenditures
Rolling Stock	$145,407,731.00	83.22%
Infrastructure*	$1,493,933.75	0.86%
Facilities	$3,440,000.00	1.97%
Equipment	$6,532,256.25	3.74%
Total SGR	$156,873,921.00	89.78%

*The Infrastructure Asset category only applies to providers of rail transit. RTA is the sole operator of rail transit in the region.

The figures above demonstrate that the projects in the TIP can be expected to contribute to achievement of both highway and transit performance measures. As they are implemented over the next four Federal Fiscal Years it is anticipated that the region will make measurable progress towards meeting its goals. This progress will be monitored by the RPC and tracked through multiple mechanisms, including the Annual Listing of Obligated Projects, the RPC Annual Report, and the Congestion Management Process System Performance Report.

Description of Project Lists

This document contains all regionally significant projects requiring action by the FHWA or FTA, whether or not the projects are to be funded under Title 23 USC Chapters 1 and 2 or Title 49 USC Chapter 53, pursuant to 23 CFR 450.324(f)(3). As applicable, it also includes all regionally significant projects proposed to be funded with non-FHWA and non-FTA funds (either Federal or non-Federal). The TIP describes projects under multiple categories, each listed separately in the Appendices:

[2] Based on 2025 draft NHS roadways and route ID's designated as locally-owned provided by DOTD; values include centerline mileage for each direction on divided roadways and bidirectional centerline mileage on undivided roadways.

- Appendix E includes projects obligated for construction under the previous TIP (FFY 2023-2026).
- Appendix F lists LADOTD Line Items, which describe broad funding categories that will fund projects that are not considered to be of appropriate scale for individual identification by LADOTD. These categories and the funding amounts are determined by LADOTD and provided directly to the RPC during the TIP development process.
- Appendix G lists projects to be funded by competitive grants awarded by DOT under the IIJA.
- Appendix H lists transit projects and project categories to be funded through FTA and local sources.
- Appendix I lists individual highway projects that will utilize STP and CRP funds with totals of MPO attributable funds available and programmed for each fiscal year.
- Appendix J lists individual highway projects to be funded through FHWA, state, local, and other sources as identified on each project page. In addition to projects programmed for implementation in FFY 2027 through FFY 2030, the list includes some project phases that are planned for implementation outside of the current TIP years. These are included for informational purposes only and indicate that they were planned for implementation prior to the current TIP (i.e., FY 2026 or earlier), or that they may be ready for implementation in the next TIP cycle (FFY 2031-2034).

Joint Certification of the Metropolitan Planning Process

The Regional Planning Commission hereby certifies that the transportation planning process is addressing the major issues facing the the Mandeville-Covington, New Orleans, Slidell, and South Tangipahoa Urbanized Areas, and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST Act (Pub. L. 114-94) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in US DOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

Glen Ledet, Jr., Secretary
Louisiana Department of Transportation and Development

10/30/2026
Date

Robby Miller, Chairman
Regional Planning Commission

10/16/2026
Date

Appendix A: Transportation Policy Committee Approval

Included below is the resolution passed by the Transportation Policy Committee approving the adoption of the FFY 2027-2030 TIP.

Number: 26-2006

Transportation Policy Committee of the Regional Planning Commission for
JEFFERSON, ORLEANS, PLAQUEMINES, ST. BERNARD, ST. CHARLES, ST. JOHN THE BAPTIST, ST. TAMMANY, & TANGIPAHOA PARISHES

Adoption of the Transportation Improvement Program for the Southeast Louisiana Metropolitan Planning Area for Federal Fiscal Years 2027-2030

Introduced by Councilmember Brigette Hyde, seconded by Councilmember Michelle O'Daniels, on the 13th day of October, 2026.

WHEREAS, the Transportation Policy Committee (TPC) of the Regional Planning Commission for Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany, and Tangipahoa Parishes (RPC), acting in its role as the Metropolitan Planning Organization (MPO) for the Southeast Louisiana Metropolitan Planning Area, including the Mandeville-Covington, New Orleans, Slidell, and South Tangipahoa Urbanized Areas, is responsible for carrying out a comprehensive, cooperative, and continuing transportation planning process; and

WHEREAS, the Infrastructure Investment and Jobs Act (Pub. L. 117-58 IIJA) and the preceding transportation bills establish requirements for the metropolitan transportation planning process, including the development of a Transportation Improvement Program (TIP); and,

WHEREAS, the Federal Fiscal Year (FFY) 2027-2030 TIP is a planning document which has been cooperatively developed by various federal, state, regional, and local agencies and organizations concerned with transportation planning and which describes, among other goals, the projects that would receive funding for the federal fiscal years 2027 to 2030; and

WHEREAS, the TIP is comprised of projects and goals derived from the MPO's adopted Metropolitan Transportation Plan, is consistent with local and state transportation plans, and meets the requirements of Title 23 of the Code of Federal Regulations Parts 450.324 and 450.326; and

WHEREAS, the MPO has solicited the public and interested stakeholders in an open and transparent process as detailed by the MPO's Public Participation Plan;

NOW, THEREFORE, BE IT RESOLVED: That the Transportation Policy Committee hereby adopts the Transportation Improvement Program for Federal Fiscal Years 2027 through 2030 for the Southeast Louisiana Metropolitan Planning Area; and

BE IT FURTHER RESOLVED the MPO staff is hereby authorized to submit the Transportation Improvement Program to the Louisiana Department of Transportation and Development and appropriate federal agencies, and to comply with any minor revisions necessary to facilitate submission of the program.

Whereupon, after discussion, the question was called and resulted in the following:

AYES: 40 NAYS: 0 ABSTENTIONS: 0

and the Chairman declared the Resolution duly carried.

ROBBY MILLER
CHAIRMAN

CYNTHIA LEE SHENG
TREASURER

Appendix B: TIP Public Participation Plan

The following excerpt from the RPC's Public Participation Plan describes how input from the public is gathered and used in the TIP development process, and how the RPC provides public notice and opportunities to comment on the TIP.

Section 7 —Individual Plan Outreach

2. Transportation Improvement Program

The Transportation Improvement Program (TIP) is adopted every four years by the Transportation Policy Committee (TPC). This document is prepared cooperatively by the RPC, acting in its legal capacity pursuant to 23 CFR 450 as the Metropolitan Planning Organization for the New Orleans Urbanized Areas, and the Louisiana Department of Transportation and Development (LADOTD) and affected transit operators. The current TIP consists of a priority list of projects that are being advanced toward construction over the four-year period from Federal Fiscal Year 2023 to Federal Fiscal Year 2026. Projects found in the TIP have evolved through the transportation planning process and are contained in the region's long-range Metropolitan Transportation Plan (MTP). The RPC reviews the TIP annually and selected revisions are permitted, following formal amendment procedures. The TIP may be viewed on RPC's website at www.norpc.org.

Both the local TIP and State TIP (STIP) are identical documents containing a common set of projects proposed for federal funding. The TIP and STIP are products of a consensus building process carried out jointly by the RPC and LADOTD, and both are on a four-year update cycle. Citizens and other interested parties are invited to review and comment on the document.

Candidate projects for MTP and TIP consideration come from various sources, including RPC's public outreach initiative, input from business, civic, and community organizations, state and local governmental entities, and other transportation stakeholders. Projects are first screened by RPC for technical merit and consistency with the region's adopted transportation goals and the ten planning factors which guide the implementation of the nation's transportation bill, the Infrastructure Investment and Jobs Act of 2021 (IIJA). Following the initial project screening process, potential projects are accepted into the MTP for further evaluation and refinement. During the planning phase, projects undergo a series of rigorous technical analyses to determine overall feasibility, environmental consequences, project costs, and potential funding sources before being advanced into further implementation stages. lands agencies, and federally recognized tribes with jurisdiction over land.

The MTP and TIP development process shall also provide for the design and delivery of transportation services provided by public transportation providers, those providing transportation services funded by Federal non-USDOT government agencies, Federal lands agencies, and federally recognized tribes with jurisdiction over land.

3. MTP & TIP Stakeholder and Public Engagement Process

The purpose of the MTP and TIP is to guide the decision-making process for infrastructure maintenance, improvements, and other investments for the region. To reflect the community's diverse values, interests, and needs the RPC in conjunction with data collection uses a multitude of outreach strategies to encapsulate a broader regional vision.

Each planning cycle will have a detailed Public Participation Plan with targeted measures deployed for each urbanized area.

The goals of the public outreach process are:

1. Develop an input and feedback loop with professionals from various fields as a means of creating a more holistic and integrated approach to transportation planning.

2. Encourage early and consistent involvement of stakeholders and the public throughout the planning process.

3. Provide opportunity for the public and stakeholders to engage in a meaningful manner and pursuant to 42 USC 2000(d) and the populations described therein.

4. Provide clear, timely, and accurate information as the process progresses.

5. Use a broad spectrum of techniques to gather meaningful input from the various targeted audiences.

6. Develop methods of gathering and incorporating feedback from all target audiences in a way that is useful in constructing the final product.

Stakeholder Identification the RPC serves a multitude of stakeholders within the region spanning from local units of government, special interest groups, business consortiums, to the general public. These various stakeholders are engaged based on the level of impact the plan has on a given entity/individual, cross disciplinary knowledge for added context, and general education purposes. Stakeholder groups are broken into the following categories:

1. Primary: LADOTD, Parish leaders, municipal government, and other public agencies/entities including human service and public transportation entities.

2. Secondary: Transportation related special interest groups, business development, cross disciplinary organizations, and technical advisory groups

3. General Public: Community groups and individual

Engagement Process

After identifying and categorizing stakeholders, outreach is conducted within a six-month period divided into three phases. Each phase is designed for a particular level of engagement based on the three identified categories listed above. As outreach progresses each phase is designed to lay the foundation for the next.

MTP/TIP Engagement Process

After identifying and categorizing stakeholders, outreach is conducted within a six-month period divided into three phases. Each phase is designed for a particular level of engagement based on the three identified categories listed above. As outreach progresses each phase is designed to lay the foundation for the next.

Phase 1 targets primary stakeholders using methods described as Comprehend and Engage. Strategies include conducting meetings with RPC staff, parish leaders and staff, municipal government staff, and implementation entities to discuss:

¨ Current planning documents include comprehensive municipal or parish plans, land use plans, transportation plans, hazard mitigation plans, and others. **These will be used to align the MTP with local and parish planning processes.**

¨ General transportation planning processes and policies, including Complete Streets or climate plans.

¨ Current or anticipated areas of population or economic growth

¨ Transportation issues, needs, and priorities

Phase 2 targets secondary stakeholders using methods described as Involve and Comprehend. Strategies include meetings and presentations with entities that represent public interest in regard to transportation or cross disciplinary entities or agencies and special interest groups whose efforts intersect with transportation decisions. Building from the prior phase discussions are centered around:

¨ Transportation and economic development

¨ Public transportation and human services transportation

¨ Housing

¨ Environmental impact

¨ Impact on communities and accessibility

¨ Impact of decisions on vulnerable and disadvantaged communities

At the culmination of phase 1 and 2, goals and strategies are developed using input received from stakeholders listed above.

Phase 3 targets the general public using methods of Involve and Inform. Strategies include educational newsletters, public meetings, and public hearings providing opportunity for comment on draft plan, goals and strategies, and the project list.

Evaluation and Common Themes

All comments and feedback received during the MTP's development are logged and tracked in a general database. This database is used to assess comments for

¨ Common themes

¨ Frequency

¨ Outliers

¨ Specific areas of concern

Stakeholder input is then analyzed to help guide the development of priorities and strategies, as well as identifying potential projects. Frequent and common themes provide a greater understanding of universal issues and priorities among parishes, municipalities, and other stakeholders.

Significant Change

RPC staff collect community comments on draft or recommended documents. Following the review and consideration of comments, if there have been no significant changes to the draft, then the document may be considered for adoption, approval, or endorsement. Unless specifically outlined in an engagement strategy, a second public review and comment period is not required for a recommended plan that is materially the same as the draft previously presented for community comment. However, if significant changes are made between the draft and final recommended versions of a document, the final revised draft will be made available for an additional 7-day minimum public review and comment period to allow interested members of the public the opportunity to review and comment on the changes made prior to a vote for adoption. Per 23CFR Section 450.316 (a) (1) (viii), "Providing an additional opportunity for public comment, if the final metropolitan transportation plan or TIP differs significantly from the version that was made available for public comment by the MPO and raises new material issues that interested parties could not reasonably have foreseen from the public involvement efforts."

5.Public Notice and Comment Process Agency Plans, Policies, and Work Program Including MTP, TIP, UPWP, Title VI, and PPP

The following is the public notice and comment process for updates and amendments to all federally mandated documents constructed by RPC:

1. A public notice will be distributed via e-mail to local units of government and contact lists of stakeholders to begin a 30-60 day comment period based on plan requirements.

2. Physical copies of draft plans are distributed to libraries in each parish served by the RPC

3. A public notice is printed in the newspaper of record, notifying the public of the availability of draft plans and policy documents online and in local libraries, and of the time and location of public hearings.

4. The public notice and a copy of the draft documents, updates, or amendment will be posted on the RPCs website.

5. A public hearing notice will be posted on the RPC's website. When necessary public hearings are hosted in each UZA, at the general body meeting for the RPC, and virtually to ensure access.

6. A public hearing will be held before the RPC general body meeting at the end of the comment period. Comments received on planning and policy documents prior to the hearing and any proposed revisions based on the comments will be communicated to the board. Any comments received at the hearing will be recorded in the minutes, which is standard practice for any public hearing.

7. Individual plans and policy documents will be adopted at the RPC/TPC general body meeting with any revisions based upon all of the comments received.

8. Adopted plans and policy documents report will be published and posted on the RPCs web site.

9. A summary of all significant comments received and responses to them will be incorporated into the final documents.

10. If any major amendment is made to adopted documents RPC staff will redistribute documents via proper channels and begin additional outreach

6.Annual Transit Program of Projects

The Program of Projects (POP) is the annual distribution of FTA Section 5307 and 5339 funds among the region's transit grantees, and a description of the transit projects funded by those programs that will be included in the Transportation Improvement Program.

The projects that are listed therein are prepared primarily through each transit grantee's consultative transit planning process, in coordination with RPC's own consultative TIP development public participation process as described in this guide. Transit grantees are responsible, through their own consultative public process, for providing ample opportunity to private enterprises, social services,

and the general public to participate in the development of their agency's program of projects before submittal to the RPC. RPC maintains its own process for TIP development through its Technical Advisory Group.

RPC advertises the Program of Projects for the region in local media venues pursuant to guidelines established under 49 USC 5307, 49 US 5309, and in accordance with FTA Circular 8100.1D, Chapter II, Sections 8(a) and 8(b).This notice provides at least 30 days for all interested private or public entities another opportunity to provide comments, either by mail, phone, or at the next RPC meeting.

The public notice for the TIP will state that public involvement activities and time established for public review and comments on the TIP will satisfy the POP requirements.

This process satisfies the grantee’s public participation requirements for the Program of Projects for the following recipients:

¨ Jefferson Parish Transit

¨ Plaquemines Parish

¨ Regional Transit Authority - Ferry Operations

¨ River Parishes Transit Authority (St. John and St. Charles Parishes)

¨ St. Bernard Urban Rapid Transit

¨ St. Tammany Parish

¨ Tangipahoa Parish

Appendix C: Public Comments

Comments received during the public comment period and RPC's responses are listed below.

Virginia Brisley, August 8, 2026 via RPC website: p.52 - IIJA Competitive Projects Summary: Connecting New Orleans East Please update the NAE grant to CNO to reflect the recission of unobligated funds by the Federal government. Amount awarded = $2,232,806; project delivery - NEPA/preliminary design; USDOT award type - we have asked for guidance from FHWA to determine if this is now considered a planning grant. Project description - please update to: "To accomplish this, we seek to construct shared-use trails along both the North and South Service Roads and trail connections at the existing interchanges." NO has determined that the project will no longer include pedestrian bridges across I-10.

> *RPC Response: The RPC will continue to coordinate with the City of New Orleans on this project and has updated the TIP based on the best available information at time of writing. If needed, the TIP will be amended to reflect future changes.*

Adam Davies, September 5, 2026 via RPC website: As a New Orleans resident and regular cyclist. I would like the FY 2027–2030 TIP to make walking, cycling, and public transportation safer and more practical for everyday journeys, particularly for residents who cannot drive or do not own a car.

I welcome the proposed Lafitte Greenway connections and extensions, St. Claude pedestrian safety improvements, and investments in maintaining our buses, streetcars, and ferries. These are valuable investments in a more connected region. Please strengthen the program by prioritizing the following needs.

St. Claude Avenue safety and protected bike lanes
I support the St. Claude pedestrian safety improvements (H.016659) and ask that their delivery be prioritized. Please explore accelerating the corridor study (H.016732), currently scheduled for 2028, and identify funding and milestones for subsequent design and construction. Interim safety improvements should proceed wherever possible.
Protected bike lanes should be a priority for St. Claude, alongside safer crossings, measures to reduce dangerous vehicle speeds, and accessible transit stops. Please evaluate continuous physical protection, including safe treatments at intersections and bus stops, and connections to surrounding routes and the bridge. The goal should be a corridor that people of different ages and cycling experience can confidently use for everyday trips.

Safe crossings of the Industrial Canal
Please make walking and cycling access explicit objectives of the Danziger Bridge rehabilitation (H.014283) and Ted Hickey Bridge rehabilitation (H.011969). The Danziger's very narrow pedestrian path and the absence of a dedicated walking or cycling path on Ted

Hickey leave a significant barrier between New Orleans East and neighborhoods west of the canal.
E-bikes make longer journeys to work practical for more residents, but a single unsafe bridge can prevent an otherwise achievable commute. Please examine how the available space on both bridges could be allocated, including reallocating roadway space or modifying the structures to provide physically protected crossings, with safe connections at both ends. Publish the alternatives considered and explain any constraints. Where improvements cannot be incorporated into rehabilitation, identify a funded follow-on phase and timetable.

Another option is restoring bicycle and pedestrian access through the Almonaster Avenue Bridge rehabilitation (H.014530), as previously proposed by Port NOLA. Please clarify whether funding remains available and consider this crossing alongside Danziger and Ted Hickey when identifying practical improvements to deliver within 2027–2030. The priority should be continuous, protected routes across the canal that connect people safely to jobs and everyday destinations.

St. Claude Bridge and a riverside connection
For St. Claude Avenue Bridge rehabilitation (H.016082), please clarify how the proposed work relates to recently completed repairs and the future bridge replacement associated with the IHNC Lock project.

While the existing bridge roadway may offer limited room for further cycling improvements, better connections to the pedestrian walkway and levee could provide a useful alternative, allowing cyclists to ride to the bridge, dismount, and walk across. Please assess accessible approach ramps, surfaces, wayfinding, and barriers to access while ensuring the walkway remains safe for pedestrians and wheelchair users.

Discussions about the future of the former naval base create an opportunity to assess a continuous walking and cycling route linking Crescent Park, the naval base site, the bridge, and the Lower Ninth Ward. Please coordinate with landowners and relevant agencies to identify a feasible alignment, preserve access opportunities, and fund practical initial improvements. The uncertain timing of a future replacement bridge should not prevent useful improvements to the existing connection.

Connected routes and earlier delivery
I support the Lafitte Greenway projects and ask whether the Galvez extension (H.016979) can be delivered before 2030. Please also explain what prevents the three LA 428 bicycle, pedestrian, and transit projects (H.014344–H.014346), currently listed for 2031, from advancing into the four-year program.

The Carrollton Avenue overlay from US 61 to Orleans Avenue (RPC_1307) should explicitly assess protected cycling provision, safer crossings, and transit-stop access before its scope is finalized. Similarly, the Harvey Boulevard extension, East Ames Boulevard widening, and Lapalco Boulevard widening should identify how walking, cycling, and safe access to transit will be accommodated. Across the program, please prioritize closing gaps between routes and connecting them to jobs, schools, shops, bus stops, and ferry terminals. Safe crossings, accessible sidewalks, sheltered waiting areas, secure bicycle parking, and coordination with transit operators on reliable services and convenient transfers should help these investments work together.

Please also require bridge construction plans to maintain safe walking and cycling access or provide a practical alternative, recognizing the substantial detours that canal closures can impose. In the public comment response, please identify which of these requests will be incorporated into the final program and explain any funding, design, or jurisdictional constraints preventing others from advancing.

Please publish clear project maps, funded scopes, and delivery milestones so residents can understand what will actually be delivered. Success should mean that more people can safely and reliably complete everyday journeys without needing to drive.

> *RPC Response: RPC supports and prioritizes pedestrian and bicyclist safety. The 2056 Metropolitan Transportation Plan for the New Orleans Metropolitan Planning Area describes in detail how non-motorized safety is being incorporated into the planning process, in both long-term planning and at the project implementation level. For all projects, including those in the TIP, the RPC considers and encourages the inclusion of pedestrian and bicyclist safety measures wherever possible and feasible. The decision to include such measures is ultimately at the discretion of the facility owner and project sponsor, typically parishes or cities on local routes and DOTD on state routes. The decisions made by project sponsors regarding specific project features, timelines, and coordination with other projects are based on each sponsor's individual needs and priorities. RPC contributes to, but does not direct or determine, that decision making process. Additionally, the RPC is actively developing mechanisms to make more information and data publicly available, and it will be published on the RPC website over the next several months.*

Jennifer Ruley, September 8, 2026 via RPC website: 1.) the 2025 draft NHS routes are referenced in Appendix C. Rampart St and Canal St are no longer on the list. Unclear what special considerations are given to the NHS. Unclear if the local parishes played any role in identifying these segments.
2.) Neighborhood Access and Equity Grant Program for City of New Orleans rescission of funds needs to be noted on page 52.

> *RPC Response: (1) As it relates to the TIP, the NHS designation determines which roadways are measured for federally-required Performance Measures, specifically the pavement condition, bridge condition, and system performance (congestion)*

measures. Functional classification and other roadway designations are developed cooperatively between the RPC, DOTD, FHWA, and local governments. For roadways in New Orleans, a representative from the City of New Orleans participated in the most recent round of designations. (2) The RPC will continue to coordinate with the City of New Orleans on this project and has updated the TIP based on the best available information at time of writing. If needed, the TIP will be amended to reflect future changes.

Briana McDonald, October 1, 2026 via RPC website: Please improve on bike lanes and safety for cyclists on Saint Claude Ave! Too many have died because of unsafe conditions on that road.

RPC Response: RPC supports and prioritizes pedestrian and bicyclist safety. The 2056 Metropolitan Transportation Plan for the New Orleans Metropolitan Planning Area describes in detail how non-motorized safety is being incorporated into the planning process, in both long-term planning and at the project implementation level. Two projects in the TIP, H.016732 and H.016659, specifically address non-motorized safety on St. Claude Ave., and RPC continually works with its state and local partners to identify opportunities to improve safety.

Scott Teesdale, October 2, 2026 via RPC website: I'm working with Bike Easy on Bike Streets NOLA, a map of low-stress bike routes in Orleans Parish.

1. Protected bike lanes when you repave.
H.014886 (Broad/Gentilly, 2027), RPC_1307 (Carrollton, 2029), H.015645 (Hayne Blvd, 2029) and H.015808 (Chef Menteur, 2030) all repave or rebuild busy streets. That's the cheapest time to add protected bike lanes: parking-protected where there's parking, posts or curbs where there isn't. Gentilly already has a parking-protected lane northbound; extend it from Dabadie to Derby Place and use the same design elsewhere. The City's own bikeway design guide calls for protected lanes on streets this busy, and most of these are Safety Action Plan corridors. Please build in the plan's crossing fixes too, instead of putting the old striping back. I've sent DOTD the crossings our routes use on Broad and Gentilly.

2. Carrollton: build it once.
RPC_1307 (Carrollton overlay, Tulane to Orleans) and H.015198 (S. Carrollton ped and bike), both 2029, overlap the City's Carrollton rebuild (DPW762). Please run them as one project, with parking-protected bike lanes, and list H.015198's limits.
Crossings our routes use:
- Palmyra and Cleveland: important crossings.
- Banks: City bike lane.
- Lafitte Greenway: the most important crossing to get right. The City's Greenway extension (DPW709) will cross Carrollton too.
- Washington and S. Carrollton: the City bike lane is almost unusable with Costco traffic, and there's no protection on Palmetto.

3. I-10 service road paths, Phase 1 (RPC_1313).
Strongly support. Please fund final design and move construction up if you can. Appendix F still shows the $61.5M federal grant

paying for construction; the City says it now covers preliminary design only.

4. Industrial Canal bridges.
The TIP spends about $77.6M on four canal bridges in 2027-2030. On the Danziger today, the pedestrian on-ramp near Congress Dr and France Rd is hard to find and get to, especially from south of Almonaster. There's no sidewalk coming south on France Rd, and the light poles on the bridge make the sidewalk too tight to walk a bike across. Please fix walking and biking access as part of each bridge rehab. If the Seabrook "multimodal improvements" (RPC_1321) are the walking and biking piece, build them with the 2028 rehab of that bridge.

> *RPC Response: More information about how RPC incorporates non-motorized safety into its planning process is available in the 2056 Metropolitan Transportation Plan. For all projects, including those listed in this project, RPC works with local project sponsors (typically the owner of the facility) to encourage and implement features that will enhance the safety of all roadway users. The decision to include such measures is ultimately at the discretion of the facility owner and project sponsor.*

Marc Weiss, October 12, 2026 via RPC website: I support the strong investment in bicycle and pedestrian infrastructure in this program. By my estimate, approximately $87 million is dedicated to direct cycling facilities, with additional funding for bike and pedestrian safety improvements. Key projects include the LA 52 Shared-Use Corridor in St. Charles Parish, the 40 Arpent Trail bridge in St. Bernard Parish, the Destrehan Avenue and Keyhole Canal projects in Jefferson Parish, Lafitte Greenway connections, Mississippi River Trail segments, and the Connecting New Orleans East initiative. I encourage the RPC to advance high-value connector projects now scheduled for 2030-2031 and to identify additional funding for the Lafitte Greenway connections. I also recommend coordinating Mississippi River Trail segments to ensure regional continuity, preserving bicycle and pedestrian elements through project development, and ensuring maintenance funding accompanies new trail construction. Thank you for continuing to expand safe, connected transportation options across the region.

> *RPC Response: RPC supports and prioritizes pedestrian and bicyclist safety. The 2056 Metropolitan Transportation Plan for the New Orleans Metropolitan Planning Area describes in detail how non-motorized safety is being incorporated into the planning process, in both long-term planning and at the project implementation level. The RPC continually works with its local partners to identify new opportunities to expand and improve safe facilities for non-motorized transportation.*

Appendix D: Locally-Owned NHS Routes

NHS routes owned by non-state entities are listed below, with approximate length in miles:[3]

NHS Route	Miles
Airport St.	4.7
Almonaster Ave.	1.0
Almonaster Ramp.	0.6
Causeway Blvd.	3.3
Chef Menteur Hwy.	0.4
Clarence Henry Thwy.	3.3
Clearview Pkwy.	0.3
Downman Rd.	0.1
E Causeway Approach	1.1
Earhart Blvd.	5.2
Earhart Ramp.	0.2
Felicity St.	0.1
France Rd.	3.9
Jourdan Rd.	0.5
Lake Pontchartrain Cswy.	48.3

NHS Route	Miles
Loyola Ave.	1.5
Loyola Dr.	0.3
N Causeway Blvd.	6.0
Northshore Blvd.	1.2
Poydras Ramp.	0.1
Religious St.	0.4
S Broad St.	1.4
Tchoupitoulas St.	1.1
Terminal Dr.	1.6
Tulane Ave.	0.8
Veterans Blvd.	14.5
W Causeway Approach	0.6
West End Blvd.	0.1
Williams Blvd.	0.8

[3] Based on 2025 draft NHS roadways and route ID's designated as locally-owned provided by DOTD; values include centerline mileage for each direction on divided roadways and bidirectional centerline mileage on undivided roadways.

Appendix E: Previous TIP (FFY 23-26) Projects

The tables below list projects that were obligated for construction under the previous TIP (FFY 2023-2026). Highway projects are listed first, followed by transit projects. Projects are listed first by fiscal year, then by parish, then by project number. It should be noted that a list of projects obligated in FFY 2026 was not available at the original time of adoption of this document, which occurred prior to the end of FFY 2026. Projects obligated in FFY 2026 will be published by the RPC following the end of the fiscal year.

Highway Projects Obligated for Construction, FFY 23-26*

Parish	FFY	Project Number	Project Title	Type of Improvement	Fund Source	Federal Share

* A List of Obligated Projects for FFY26 will be published by the RPC in December 2026.

Appendix F: LADOTD Budget Line Items

<LADOTD Budget Line Items will be added once they are provided by LADOTD>

Appendix G: Competitive Grant Projects

The projects listed below will be funded through competitive grant programs that were selected by USDOT and are being administered by FHWA. Since these projects are selected by USDOT and come with additional federal funding, these projects do not affect fiscal constraint of the TIP. Any projects that will supplement competitive grant funding with federal-aid formula funding are listed individually in Appendices G through I because adding regular federal-aid formula funds to a project affects the fiscal constraint of the TIP.

Louisiana US DOT-FHWA IIJA Competitive Projects-Summary as of July 2026

Program Name	Award Year	US DOT Award Type	Project Delivery Phase Included	#	Amount Awarded	Total Project Cost	State DOT Recp.	Sponsor Name	Project #	Project Name	Project Description	Location/MPO Area
Charging and Fueling Infrastructure (CFI)	FY 24	Construction	NEPA/Design/Construction		$5,647,300.00	$7,059,125.00	YES	Jefferson Parish	To be Determined	Fat City Charging and Fueling Infrastructure Project	Jefferson Parish will receive nearly $5.7 million to install EV charging stations in a part of the Parish called Fat City. The stations will be located in population centers, along the Interstate system and major thoroughfares, and will have access to retail, eateries, and bathrooms. The project supports resiliency by including sites located on an evacuation route that will include battery backup.	New Orleans
Charging and Fueling Infrastructure (CFI)	FY 24	Construction	NEPA/Design/Construction		$9,342,038.00	$9,342,038.00	YES	City of New Orleans	To be Determined	New Orleans Community Electric Vehicle Charging (NOCEVC) Program	The City of New Orleans will receive $9.3 million to install EV chargers at 50 locations across the city's five districts, including at Dillard University and Xavier University. The project emphasizes investment in underserved areas, with 60% of the infrastructure in disadvantaged communities.	New Orleans
Neighborhood Access and Equity Grant Program (NAE)	FY 23	Construction	NEPA/Design/Construction		$61,544,718.00	$61,544,718.00	NO	City of New Orleans	Not Applicable	Connecting New Orleans East for Pedestrian and Bicyclist Safety and Mobility	The proposed project seeks to improve safety and mobility for people walking, bicycling, and using transit along the I-10 Service Road corridor in New Orleans East. To accomplish this, we seek to construct shared-use trails along both the North and South Service Roads, trail connections at the existing interchanges, and construct new non-motorized bridge crossings of I-10.	New Orleans
Better Utilizing Investments to Leverage Development (BUILD)	FY 24	Planning	Planning		$7,363,098.00	$7,363,098.00	YES	Plaquemines Port Harbor & Terminal District	To be Determined	Peters Road Bridge Extension	This project will fund the preliminary design activities including Environmental Assessment and right-of-way mapping for Peters Road Bridge and Extension, Phase III. The project to be planned will extend Peters Road from the southern boundary line of Jefferson Parish south to LA 23 in Plaquemines Parish and includes a new bridge over the Gulf Intracoastal Waterway.	New Orleans

Better Utilizing Investments to Leverage Development (BUILD)	FY 22	Planning	Planning	$2,450,000.00	$2,450,000.00	NO	City of Slidell	Not Applicable	Bayou Patassat Green Corridor Project - Phase II	The project will include planning, feasibility, and design activities. This project will ultimately design an interconnected network of facilities within four study areas of the Olde Towne Slidell Waterfront Masterplan. These include ADA accessible sidewalks/crosswalks, new bicycle and pedestrian paths, a boardwalk design along Bayou Bonfouca, consolidated parking along the corridor, waterway transport options, and micro-transit options.	New Orleans
Better Utilizing Investments to Leverage Development (BUILD)	FY 22	Construction	Design/ Construction	$1,099,455.00	$1,374,319.00	YES	Plaquemines Parish	H.016753	Ferry Road Improvement Project	This project will construct a hard-surface access roadway to the Pointe-a-la-Hache ferry facility in Plaquemines Parish. It shall include a new southbound left turn lane on Highway 23 and a northbound deceleration turn lane and acceleration lane. Subsurface drainage will be improved to accommodate the new roadway and a nominal parking area will be included to accommodate commuters and pedestrians. This road will replace the existing ferry access road and facility that has been damaged over the years by various storms, high river currents, and corrosion	New Orleans
Reconnecting Communities Program (RCP)	FY 22	Planning	Planning	$500,000.00	$625,000.00	YES	LADOTD	To be Determined	Reconnecting Claiborne Planning Grant (RCP)	The purpose of this planning and feasibility study is to build upon the results of previous planning efforts in order to develop and evaluate proposed improvement alternatives that seek to address environmental, socioeconomic, and transportation-related inequities along Claiborne Avenue, while maintaining operations and safety for interstate traffic.	New Orleans
Reconnecting Communities Program (RCP)	FY 22	Planning	Planning	$960,000.00	$1,200,000.00	NO	City of Slidell	Not Applicable	City of Slidell Mobility Masterplan (Connect Slidell)	This Community Planning Grant solely seeks funding for the Phase I Planning activities of the City of Slidell Mobility Master Plan (Connect Slidell), to plan for a more interconnected transportation infrastructure and livable city for all.	New Orleans
Reduction of Truck Emissions at Port Facilities (RTEPF)	FY 23	Technology	Procurement	$7,117,567.00	$8,909,123.00	NO	Port of New Orleans	Not Applicable	Electric Pilot for Port NOLA & Terminal Fleets	The Port of New Orleans and its partners, are requesting funding to upgrade infrastructure, purchase 14 heavy-duty (HD) terminal trucks and five light-duty (LD) pickup trucks. Funding will additionally support workforce development through partnerships.	New Orleans

Rural Surface Transportation Grant (RURAL)	FY 22	Construction	NEPA/Design/Construction	$25,000,000.00	$52,000,000.00	YES	LADOTD	H.015425	Louisiana DOTD Ferry Design & Construction	The project will design and construct two ferry boats. One ferry boat will provide continued access across the Mississippi River between Highway 23 and Highway 39 at Pointe a la Hache, and between Belle Chasse and Scarsdale in Plaquemines Parish.	New Orleans
Safe Streets and Roads for All (SS4A)	FY 22	Planning	Planning	$751,631.00	$994,131.00	NO	City of New Orleans	Not Applicable	City of New Orleans Comprehensive Safety Action Plan	This award will be used by the City of New Orleans to develop a Comprehensive Safety Action Plan.	New Orleans
Safe Streets and Roads for All (SS4A)	FY 23	Planning	Planning	$400,000.00	$500,000.00	NO	Plaquemines Parish	Not Applicable	Plaquemines Parish Comprehensive Safety Action Plan	The award will be used by the Plaquemines Parish Government to develop a comprehensive safety action plan.	New Orleans
Safe Streets and Roads for All (SS4A)	FY 23	Planning	Planning/ Demo	$352,000.00	$440,000.00	NO	City of Gretna	Not Applicable	City of Gretna, LA Transportation Safety Action Plan & Demonstration Activates	This award will be used by the City of Gretna to develop a comprehensive safety action plan and to pilot demonstration activities such as temporary "Yield Here to Pedestrians" signage and high-visibility crosswalks at 6 intersections with high pedestrian counts to test strategies to address intersection-related crashes in the City involving pedestrians.	New Orleans
Safe Streets and Roads for All (SS4A)	FY 24	Planning	Planning	$200,000.00	$250,000.00	NO	St. Charles Parish	Not Applicable	St. Charles Parish Safe Streets for All Action Plan	This award will be used by St. Charles Parish to develop a comprehensive safety action plan.	New Orleans
Safe Streets and Roads for All (SS4A)	FY 24	Demonstration	Planning/ Demo	$360,000.00	$450,000.00	NO	City of NOLA	Not Applicable	City of New Orleans - New Orleans Roadway Lighting Safety Supplemental Plan	This award will be used by the City of New Orleans to reduce the number of nighttime fatal crashes in the City though a comprehensive lighting plan that addresses the challenges facing the deployment, operations, and maintenance of roadway lighting in the city.	New Orleans
Safe Streets and Roads for All (SS4A)	FY 24	Planning	Planning	$150,000.00	$187,500.00	NO	Downtown Development District of NOLA	Not Applicable	Downtown Development District of NOLA - Downtown NOLA Supplemental Transportation Safety Action Plan	This award will be used by the Downtown Development District of New Orleans to conduct supplemental planning efforts that leverage and build upon the Citywide Comprehensive Safety Action Plan, providing enhanced safety and network analysis for this critical area, and expanding public engagement opportunities beyond what is feasible at a citywide level.	New Orleans

Appendix H: Transit Projects

Note: The “Comment” field in the Transit TIP indicates the state of good repair asset management category to which a project contributes. The abbreviations for categories are as follows:

- RS: Rolling Stock
- EQ: Equipment
- FA: Facilities
- IN: Infrastructure (applies to rail infrastructure only; RTA is the sole operator of rail transit in the region)

2027 Transportation Improvement Program - New Orleans UA Transit Element

Appendix I: Fiscal Constraint Summary

The projects listed below are programmed to be funded through MPO attributable federal sources (STP and CRP). Projects are listed by Federal Fiscal Year (FFY), then UZA, then Parish. The list includes the following information:

- UZA
- Parish
- Project Number
- Project Phase
- Name
- Description
- Total Cost (totaled at bottom of table)
- Total Cost + 15% Contingency (totaled at bottom of table)
- Federal Share (totaled at bottom of table)
- Federal Funding Source
- Non-federal Share (totaled at bottom of table)
- Project Sponsor
- Relationship to MTP Goals
- FFY

Each fiscal year is followed by a summary table including the following for STP>200K, STP 50-200K, CRP>200K, and CRP 50-200K funds:

- Funds carried forward from previous FFY
- Funds attributable to the MPO in the current FFY
- Total funds available in the current FFY
- Federal share of funding programmed in current FFY
- Remaining funds to be carried forward into next FFY

Appendix J: Highway Projects

Projects in the TIP are listed alphabetically by UZA, then parish, then by Federal Fiscal Year, then in ascending order by state project number. An example project page and field descriptions are included below.

1.	State Project Number
2.	Project Title
3.	Is/Is Not a Line Item in State TIP
4.	Route Number
5.	State Control Section
6.	Beginning State Log Mile
7.	Ending State Log Mile
8.	Parish in which Project is Located
9.	Non-state Road Name
10.	Additional Comments
11.	Improvement Description
12.	Work Category
13.	FHWA Performance Measure Category
14.	MTP Goal (1 = Safety; 2 = Sustainability & Resilience; 3 = Community Impact; 4 = Econ. Development; 5 = Reliability & Connectivity; 6 = Preservation & Stewardship)
15.	Project Phase
16.	Project Cost
17.	Project Cost plus 10% Contingency
18.	Federal Share of Phase
19.	Funding Source(s)
20.	Federal Fiscal Year
21.	Project Sponsor
22.	Funding Totals
23.	Project Urbanized Area
24.	Project Parish(es)
